**An excellent book for the
Preparation of the Board's
Examination**

GEOGRAPHY STANDARD X

This book contains ...

1. Format of the Question paper at the beginning of the book
2. Study Tips for Students
3. **Section 1** : Board's July 2024 Question paper with full Solution
4. **Section 2** : Question Sets for Question-wise study and Revision :
 - (a) Guidance on how to attempt the question
 - (b) Solved questions
5. **Section 3** : Assignments – Questions for Practice
6. Many questions related to Maps and diagrams with answer
7. **Section 4** : Board's July 2025 Question Paper for Practice (with Answers on QR Code)

With 21 MLQ... Success awaits you!

Format of Question Paper

Question Number	Question Type	Marks	Marks with options
Q. 1	- Choose the correct option - Identify the correlation and make a chain - Identify correct group	4	4
Q. 2	- Match the correct pairs - Identify the odd man out - Arrange the sentences in correct sequence - Complete the series - Identify the incorrect/wrong pair	4	4
Q. 3	- Answer in one sentence (To attempt 4 out of 5) - Name the following (To attempt 4 out of 5) - Say right or wrong (To attempt 4 out of 5) - Identify the type on the basis of the statement (To attempt 4 out of 5) - Differentiate between (To attempt 2 out of 3) - Write short notes (To attempt 2 out of 3)	4	5/6
Q. 4 (A)	Fill the map and make an index (Any 4 out of 6 information to be filled)	4	6
(B)	Answer the following questions on the basis of the given map (To attempt 4 out of 5)	4	5
Q. 5	Give geographical reasons (To attempt 2 out of 4)	6	12
Q. 6 (A)	Draw a graph with the help of the given statistical information and answer the questions based on drawn graph	6	12
OR			
Q. 6 (B)	Answer the following by reading the graph (To attempt 6 out of 6)	6	12
Q. 7	- Answer in detail (To attempt 2 out of 3) - Explain (To attempt 2 out of 3)	8	12
	Total	40	60/61

Study Tips

Dear Students,

The syllabus must be nearing completion. The coming days are for self-study and to make an effective study plan.

So far, during the year '**Navneet Digests**' have helped you in your studies. From now onwards start your preparations with the help of '**21 Most Likely Question Sets**' which are based on the latest paper pattern.

You will know about the important questions from examination point of view and guidance on how to write accurate answers.

How will you prepare for your Board exam in this limited but crucial time period?

1. First of all carefully analyse the **Model Question Paper** and all types of questions based on the latest paper pattern.
2. Keep in mind that **Q.1.**, **Q.2.** and **Q.3.** are objective type questions. The questions like fill in the blanks, match the pairs, identify incorrect pair, identify odd man out, answer in one sentence, differentiate between, complete the chain, etc. will be asked in these questions. By thorough revision, you can score full marks in these questions.
3. **Q.4.** will be a map based question. A separate map will be provided for map filling. For map reading, a map will be given in question paper. **Q.5.** will be a question of give reasons. **Q.6.** will be a diagram/graph based question. By thorough practice, you can score full marks in all these questions.
4. **Q.7.** will be Long answer question. You can answer this question with suitable diagrams wherever necessary.
5. By careful analyses of the Solved **Board's Question Paper of July 2024** and **Board's Question Paper of July 2025** given for practice, you will realise that your basic concepts of every chapter of Geography must be very clear.
6. Speed, accuracy and writing practice are also essential to master the art of answering the questions.
7. Solve all the question papers given for practice in Navneet Practice Papers : Std. X. It will surely help you to familiarise yourself with questions of different types and boost your confidence.

**ALL THE BEST FOR YOUR FURTHER STUDIES AND
THE FORTHCOMING BOARD EXAMINATION.**

Section 3 : ASSIGNMENT (Questions for Practice)		...	128
Section 4 : BOARD'S QUESTION PAPER : JULY 2025 (With Answers on QR Code)		...	132

Time : 2 Hours]

[Max. Marks : 40

Note : (1) All questions/activities are compulsory.

(2) Figures to the right indicate full marks.

(3) For Q. No. 4 (A) use supplied outline map of India/Brazil and tie it to the main answer-book.

(4) For Q. No. 6 (A) use the graph paper supplied to you and attach that supplement to the main answer-book.

(5) Draw neat diagrams and sketches wherever necessary while writing answers.

(6) Use of stencil is allowed for drawing maps wherever necessary while writing answers.

(7) Answers should be written in black or blue pen only. Answers written in pencil will not be considered.

(8) Use of pencil or colour pencil is allowed for diagrams, graphs and map work.

Note : (1) Any **one or two** of the following **question types** will be asked : (i) Choose the correct options (ii) Identify the correlation and make a chain (iii) Identify correct group.
(2) **All** questions in Q. 1. will be compulsory.

Q. 1 Choose the correct options and rewrite the sentences : 4

(1) Visiting a given place and gaining first hand information is known as (**Ch. 1**)

- (i) Field visit (ii) Health tourism
(iii) Census (iv) House visit

(2) India is famous for all over the world. (**Ch. 2**)

- (i) Oilseeds (ii) Coffee
(iii) Cocoa (iv) Spices

(3) Brazil is the most populated country in the continent. (**Ch. 6**)

- (i) North America (ii) Asia
(iii) South America (iv) Australia

- (4) The Indian Standard Time is ahead by from the Greenwich Meridian Time. **(Ch. 9)**
(i) 5 Hours 15 Minutes (ii) 5 Hours 30 Minutes
(iii) 5 Hours 45 Minutes (iv) 6 Hours 30 Minutes

Answers

- (1) Visiting a given place and gaining first hand information is known as Field visit.
(2) India is famous for Spices all over the world.
(3) Brazil is the most populated country in the South America continent.
(4) The Indian Standard Time is ahead by 5 Hours 30 Minutes from the Greenwich Meridian Time.

(1 mark for each correct answer. Total 4 marks.)

Note : (1) Any **one or two** of the following **question types** will be asked : (i) Match the correct pairs (ii) Identify the odd man out (iii) Arrange the sentences in correct sequence (iv) Complete the series (v) Identify the incorrect/wrong pair.
(2) **All** questions in Q. 2. will be compulsory.

Q. 2 Identify the wrong pair :

- (1) (a) Amazon river basin → North of Brazil
(b) Puraguaco river basin → West of Brazil
(c) Sao Francisco river basin → East of Brazil
(d) Paraguay and Parana river basin → South-West of Brazil

(Ch. 3)

- (2) (a) Climate of India → Monsoon
(b) North of Brazil → Equator
(c) Centre of India → Tropic of Capricorn
(d) East of Brazil → Atlantic Ocean **(Ch. 4)**

- (3) (a) Country with low sex ratio → India
 (b) Country with higher literacy rate → Brazil
 (c) Country with higher proportion of youth → Brazil
 (d) The country with lower proportion of the old age people → India (**Ch. 6**)
- (4) (a) Gateway of India → Mumbai
 (b) Ajanta Caves → Aurangabad
 (c) Taj Mahal → New Delhi
 (d) Kolkata → Major port of India (**Ch. 9**)

Answers

- (1) **Wrong pair** : (b) Puraguaco river basin – West of Brazil
 (2) **Wrong pair** : (c) Centre of India – Tropic of Capricorn
 (3) **Wrong pair** : (c) Country with higher proportion of youth – Brazil
 (4) **Wrong pair** : (c) Taj Mahal – New Delhi
 (1 mark for each correct answer. Total 4 marks.)

Note : (1) Any **one or two** of the following **question types** will be asked : (i) Answer in one sentence (ii) Name the following (iii) Say right or wrong (iv) Identify the type on the basis of statement (v) Differentiate between (vi) Short notes. (2) Questions in Q. 3. will be given with internal options. Students will have to attempt **any 2 out of 3** of differentiate between/short notes or **any 4 out of 5** of other question types. (3) Answers of all three questions are given here.

Q. 3 Write short notes on : (Any two)

4

- (1) India – location and extent. (**Ch. 2**)
 (2) Escarpment. (**Ch. 3**)
 (3) Importance of Indian Ocean. (**Ch. 4**)

- (1) (1) India is spread in the Northern and Eastern Hemisphere of the earth. It is located in the Southern part of the Asian continent.
- (2) The latitudinal extent of the mainland of India is from $8^{\circ}4'N$ latitude to $37^{\circ}6'N$ latitude. The longitudinal extent of India is from $68^{\circ}7'E$ longitude to $97^{\circ}25'E$ longitude.
- (3) Indira Point is the southernmost point of India's territory. It is located on Nicobar island at $6^{\circ}45'$ latitude.
- (4) The Tropic of Cancer passes through the centre of India.

- (2) (1) The Great Escarpment is the smallest physiographical region of Brazil. From Sao Paulo to Porto Alegre, the height of Brazilian Highlands/Plateau decreases remarkably leading to the formation of the Great Escarpment. The Great Escarpment demarcates the eastern side of the Brazilian Highlands/Plateau.
- (2) The altitude of Brazilian Highlands is approximately 790 m in the region of the Great Escarpment. In other regions, its height decreases gradually.
- (3) The nature and the slope of the Great Escarpment affects the climatic conditions of Brazil. It acts as a barrier to the southeast Trade winds.
- (4) The Great Escarpment leads to heavy rains in the Brazilian coastal areas and it also gives rise to the rain shadow area to the northeast of the Brazilian Highlands. This rain shadow area is known as 'Drought Quadrilateral'.

- (3) (1) The Indian Ocean plays an important role in the formation of southwest monsoon winds.

- (2) In summers, the temperature in Punjab Plains and the Thar desert is found to be high. As its effect, the areas of low pressure are developed.
- (3) On the other hand, the areas of high pressure are found in the Indian Ocean. This leads to formation and flowing of southwest monsoon winds from the Indian Ocean to the mainland of India.
- (4) These winds are moisture-laden and so they bring rainfall in India.

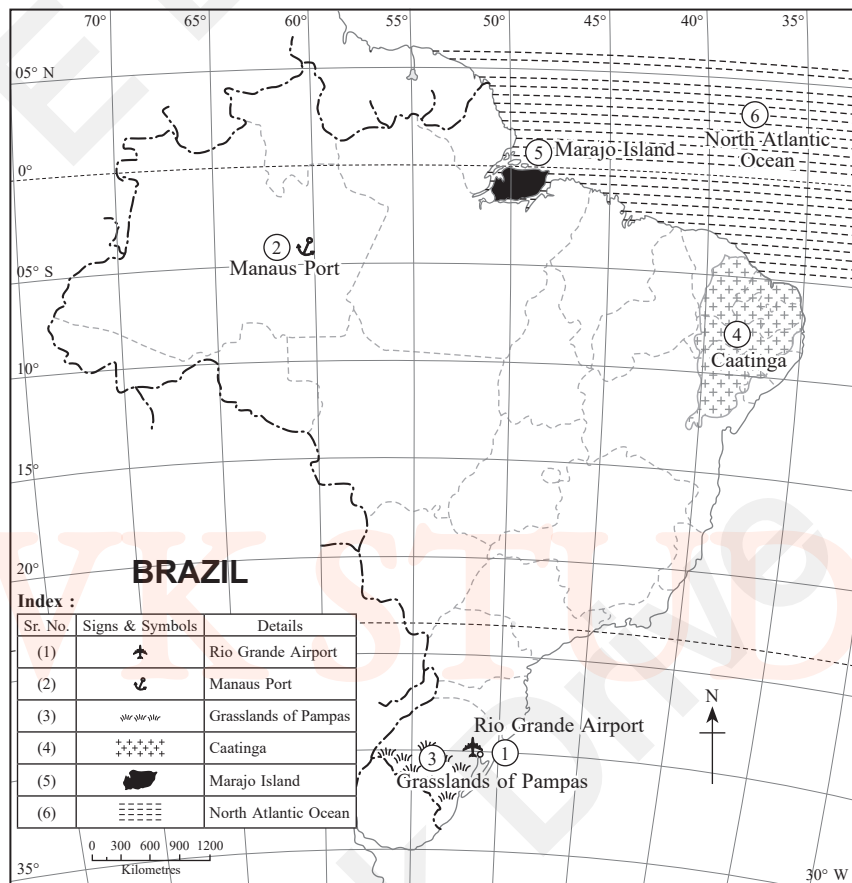

(2 marks each for any two sub-questions. Total 4 marks)

Note : (1) A map of India/Brazil with details will be given. (2) Q. 4. (A) will be given with internal options. (3) Students will have to fill **any 4 out of 6** details. (4) All six details are shown on a map here.

Q. 4 A Mark the following in the outline map of Brazil supplied to you, write the names and give index : (Any four)

4

- (1) Rio Grande Airport **(Ch. 9)**
- (2) Manaus Port **(Ch. 9)**
- (3) Grasslands of Pampas **(Ch. 5)**
- (4) Caatinga **(Ch. 3)**
- (5) Marajo Island **(Ch. 3)**
- (6) North Atlantic Ocean **(Ch. 2)**

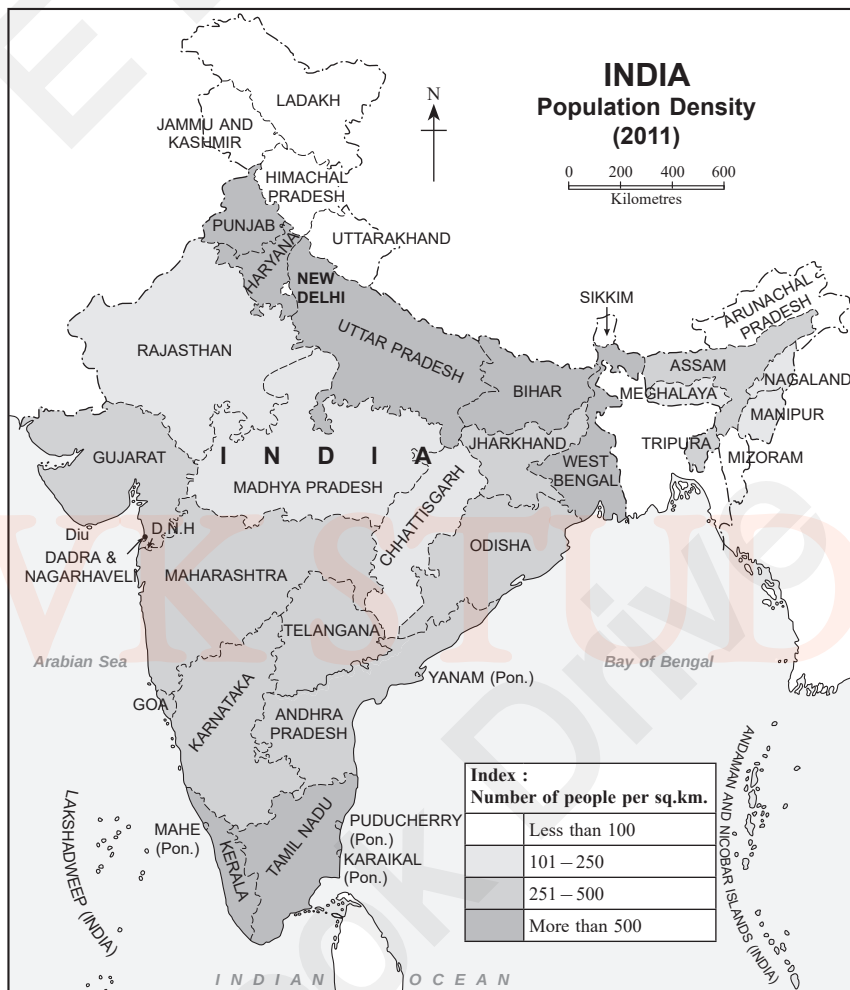

(1 mark each for any four sub-questions. Total 4 marks.)

Note : (1) A map of India/Brazil with questions will be given.
 (2) Q. 4. (B) will be given with internal options. (2) Students will have to write answers to **any 4 out of 5** map based questions. (3) Answers of all five questions are given here.

Q. 4 B Observe the given map and answer the questions given below it : (Any four) (Ch. 6)

4

Questions :

- (1) What does the map show?
- (2) Name any *two* states with less than 100 people per sq. km.
- (3) Write the population density of Madhya Pradesh.
- (4) Name any *two* southern states with more than 500 people per sq. km.
- (5) Write the density of Mizoram state.

— ■ ■ ■ **Answers** ■ ■ ■ —

- (1) The map shows Population Density of India (2011).
- (2) The names of two states with less than 100 people per sq. km. : (i) Himachal Pradesh (ii) Arunachal Pradesh.
- (3) The population density of Madhya Pradesh is 101 to 250 people per sq. km.
- (4) The names of two southern states with more than 500 people per sq. km. (i) Tamil Nadu (ii) Kerala.
- (5) The density of Mizoram state is less than 100 people per sq. km.

(1 mark each for any four sub-questions. Total 4 marks.)

Note : (1) Four statements will be given. (2) Q. 5. will be given with internal options. (3) Students will have to write geographical reasons for **any 2 out of 4**. (4) Answers to all four questions are given here.

- Q. 5 Give geographical reasons : (Any two)** **6**
- (1) India is a major trading partner for other countries of the world. **(Ch. 2)**
 - (2) Brazil does not receive snowfall. **(Ch. 4)**
 - (3) Settlements are sparse in Northeastern Brazil.
(Ch. 7)
 - (4) Telecom industry has become one of the fastest growing sector in India. **(Ch. 9)**

— ■ ■ ■ **Answers** ■ ■ ■ —

- (1) (1) India is one of the major developing countries.
- (2) After independence, many economic reforms took place in India. These reforms increased the rate of economic development in India.
- (3) The proportion of working population (youth) is comparatively high in India. Therefore, India is a major developing country of the world.

- (2) (1) Snowfall generally occurs in the temperate and polar zone due to polar winds. It also occurs in the mountainous and hilly regions of high altitudes.
- (2) Brazil is not located in polar region. Most of its part is located in the tropical zone.
- (3) There are no mountainous regions in Brazil. Therefore, snowfall doesn't always occur in Brazil.
-

- (3) (1) Northeastern Brazil is a rain shadow region.
- (2) The amount of annual average rainfall in this region is only 600 mm. Therefore, this region is considered as drought-prone.
- (3) Due to scanty rainfall, agriculture and other industries are not well-developed in this region. Therefore, settlements are sparse in northeastern Brazil.
-

- (4) (1) India has made progress in the field of information technology and communication.
- (2) The electronic devices such as computer, mobiles, internet, satellites, etc. are widely used in India.
- (3) Today, India is one of the largest countries using smartphones and internet for wide reach of communication.
- (4) With the development of its own satellite, India has proved itself in the field of modern communication. Therefore, telecom industry has become one of the fastest growing sector in India.
-

(3 marks each for any two sub-questions. Total 6 marks.)

Note : (1) Q. 6. will be given with internal options. (2) Students will have to write either (A) **OR** (B). (3) For Q. 6. (A), students will have to prepare a graph with the help of given statistical data and answer three graph-based questions **OR** For Q. 6. (B), students will have to observe the given graph and answer six graph-based questions. (4) Answers of both questions are given here.

- Q. 6 A With the help of given statistical data, prepare a simple bar graph and answer the following questions : (Ch. 7)

6

India – Trend of Urbanisation

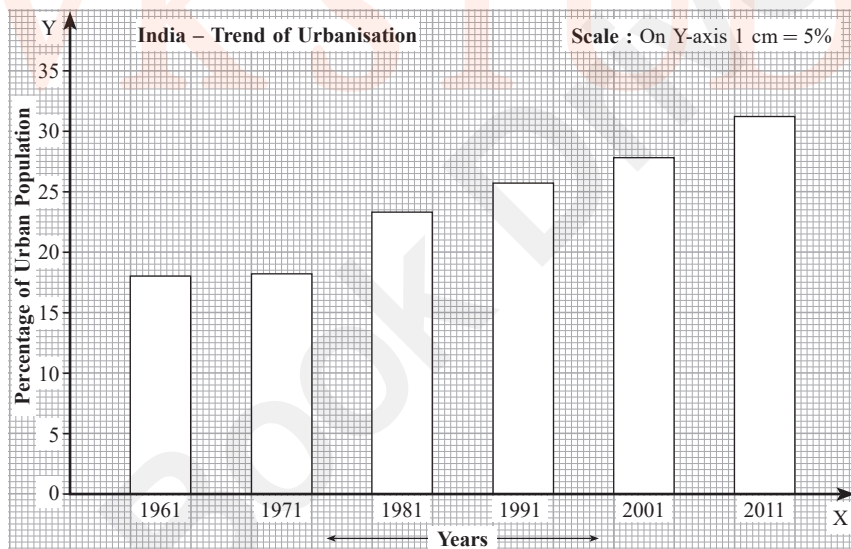

Year	1961	1971	1981	1991	2001	2011
Trend of Urbanisation	18.0	18.2	23.3	25.7	27.8	31.2

Questions :

- (1) In which decade was urbanisation the highest?
- (2) By how much percentage did urbanisation increase between 1981 to 1991?
- (3) In which decade was the growth of urbanisation lowest?

Answers

Simple Bar Graph

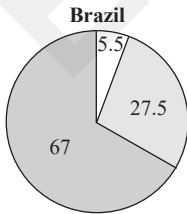

- (1) Urbanisation was the highest in 2011.
- (2) Urbanisation increased by 2.4% between 1981 to 1991.
- (3) The growth of urbanisation was lowest in 1961.

(3 marks for graph; 3 marks for graph-based questions; Total 6 marks.)

OR

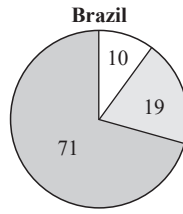

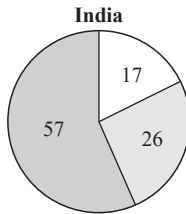

Q. 6 B Observe the following figures and answer the questions given below them : (Ch. 8)

6

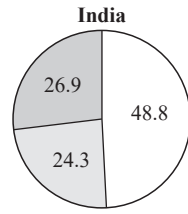

Contribution of sectors in GDP (2016)

□ Primary □ Secondary ■ Tertiary

Percentage of population engaged in various sectors (2016)

□ Primary □ Secondary ■ Tertiary

Questions :

- (1) Which country has a higher percentage of population engaged in primary activities?
- (2) In which country is the contribution of tertiary sector greater in GDP?
- (3) In which country is the share of secondary activities more in the GDP?
- (4) What is the contribution of secondary sector in India's GDP?
- (5) By how much per cent is the tertiary sector of Brazil higher than India in its GDP?
- (6) Name the sector of India which contributes less in GDP but more in population.

Answers

- (1) India has a higher percentage of population engaged in primary activities.
- (2) The contribution of tertiary sector is greater in GDP in Brazil.
- (3) The share of secondary activities is more in GDP in Brazil.
- (4) The contribution of secondary sector in India's GDP is 26%.

- (5) The tertiary sector of Brazil is higher than India in its GDP by 10%.
- (6) Primary sector of India contributes less in GDP but more in population.

(1 mark for each sub-question. Total 6 marks.)

Note : (1) Any **One or Both** of the following **question types** will be asked : (i) Answer in detail (ii) Explain. (2) Q. 7. will be given with internal options. Students will have to write answers of **any 2 out of 3** questions. (3) Answers to all three questions are given here.

Q. 7 Answer the following questions in detail : (Any two) 8

- (1) What is field visit? What precautions you will take when you visit a sea coast? **(Ch. 1)**
- (2) Write detailed information on Himalayan Mountains. **(Ch. 3)**
- (3) What are the major causes of degradation of forest in Brazil and India? **(Ch. 5)**

Answers

(1) (A) Meaning :

- (1) Geography can be studied better by observation.
- (2) The entire earth is considered as the laboratory for geography.
- (3) The study of entire earth is not possible for field visit.
- (4) So a small specific area is selected of which we study the natural and cultural features is called as field visit.

(B) We will take of the following precautions when we visit a seashore :

- (1) While going for a field visit to a seashore we will confirm the timings of high and low tides.
- (2) We will take a local guide while visiting a seashore or a mountainous region. We will not go to an unknown place.

- (3) We will avoid taking a selfie near risky areas like sea cliffs or any other places in the deep sea.
 - (4) We will not enter into deep sea for swimming.
 - (5) We will keep the seashore clean. We will not litter.
 - (6) We will follow all the instructions given by our teacher and written on the boards near the seashore.
-

- (2)** (1) Himalayas is one of the young fold mountains in the world. It extends from Pamir Knot in Tajikistan in the west to the east. Himalayas is one of the major mountain systems of the continent of Asia.
- (2) In India, Himalayas extends from Jammu and Kashmir in the north to Arunachal Pradesh in the northeast. Himalayas as well as many other parallel mountain ranges get included in Himalayas mountain system. Shivalik is the southernmost mountain range of Himalayas. It is the youngest mountain range of Himalayas.
- (3) As we move from Shivalik range in the south to the north, we come across Lesser Himalayas, Greater Himalayas and Trans Himalayan ranges respectively. These ranges are young to old respectively.
- (4) The Himalayan mountain ranges can also be divided from the west to the east into Western Himalayas (or Kashmir Himalaya), Central Himalaya (or Kumaun Himalayas) and Eastern Himalaya (Assam Himalayas).
-

- (3)** The following are the major causes of degradation of forests in Brazil and India :
- (1) In Brazil, as well as in India, there is shortage of land for human settlements.
- (2) For obtaining the space for settlements, trees are cut down on a large scale in both the countries.

- (3) Roka type of farming is practised in Brazil. Zoom agriculture is practised in India. In these types of farming, the forest area is cleared on a large scale for the agricultural activities.
- (4) In both the countries, trees are cut down on a large scale to obtain firewood and to satisfy other domestic needs.

(4 marks each for any two sub-questions. Total 8 marks.)

(Activities And Projects)**

Question
Set
1

CHOOSE THE CORRECT OPTIONS

[Q. 1 : Total Marks 4]

Q. Write the following statements by choosing the correct options : **(4 statements; 1 mark each)**

Remember : (1) Four statements will be given in the question paper. (2) Choose the correct option, rewrite the statement and underline the option choosen. (3) Do not overwrite. (4) Do not change the sequence of statements given in the question paper.

CHAPTER 1 : FIELD VISIT

- (1) is used for knowing directions.
(a) Scale (b) Notebook
(c) Compass (d) Camera
- (2) is not an essential material of field visit.
(a) Notebook (b) Map
(c) Bar chart (d) Camera
- (3) We should carry for a field visit to collect information.
(a) chair (b) blackboard
(c) water bottle (d) questionnaire

(March '24)

Ans. (1) Compass is used for knowing directions.

(2) Bar chart is not an essential material of field visit.

(3) We should carry questionnaire for a field visit to collect information.

Note : While answering this question, students should write the full statements and underline the chosen option (answer word) as shown above. From next chapter onwards only the appropriate words or figures are given as answers for saving space.

CHAPTER 2 : LOCATION AND EXTENT

(1) India's southernmost point is known as
(July '19)

- (a) Lakshadweep (b) Kanyakumari
(c) Indira Point (d) Port Blair

(2) India is located in the hemispheres of the earth.
(March '22)

- (a) Northern and Eastern (b) Southern and Western
(c) Northern and Western (d) Southern and Eastern

(3), these two countries in South America do not share their border with Brazil.

- (a) Chile – Ecuador (b) Argentina – Bolivia
(c) Columbia – French Guiana (d) Suriname – Uruguay

(4) Brazil is famous for dance. (Nov. '20)

- (a) Samba (b) Bihu
(c) Bhangda (d) Bharatanatyam

(5) India and Brazil have type of Government.

(July '23; March '25)

- (a) Military (b) Communist (c) Republic (d) Presidential

Ans. (1) Indira Point (2) Northern and Eastern (3) Chile – Ecuador (4) Samba (5) Republic.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

(1) Brazil is covered mainly by (March '19–'22)

- (a) highlands (b) plains
(c) mountainous region (d) dissected hills

(2) Like Brazil, India too has (July '22)

- (a) high mountains (b) ancient plateau
(c) west-flowing rivers (d) snow-capped mountains

(3) Amazon is a large river in the world. Near its mouth
(Nov. '20; Sept. '21)

- (a) deltaic regions are found (b) no deltas are found
(c) deposition of sediments occurs (d) fishing is done

- (4) The total coastline of India is km long.
(a) 7,100 (b) 7,400 (c) 7,700 (d) 7,500 **(Sept. '21)**
- (5) The Lakshadweep Islands of the Arabian Sea are
(March '23)
(a) made from the part separated from the mainland
(b) coral islands
(c) volcanic islands
(d) continental islands

Ans. (1) highlands (2) ancient plateau (3) no deltas are found
(4) 7,500 (5) coral islands.

CHAPTER 4 : CLIMATE

- (1) India's climate is of type.
(March '19; Sept. '21)
(a) humid (b) monsoon (c) equatorial (d) cold
- (2) Brazil gets rainfall from south-east and north-east winds.
(March '22)
(a) monsoon (b) trade (eastern) (c) anti-trade (d) cyclonic
- (3) In Brazil, receives orographic rainfall.
(a) Guyana Highlands
(b) windward side of the Great Escarpment
(c) Amazon river basin
(d) Paraguay – Parana river basin
- (4) As the extent of Brazil is more, there is a variety in climatic conditions.
(a) equatorial (b) latitudinal and longitudinal
(c) longitudinal (d) latitudinal
- (5) The Himalayas block the wind's blowing from the north.
(March '25)
(a) very cold (b) very hot (c) hot and dry (d) humid

Ans. (1) monsoon (2) trade (eastern) (3) windward side of the Great Escarpment (4) latitudinal (5) very cold.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

- (1) Teak is mainly found in the type of forest.
(March '19)
(a) coastal (b) thorny and bush
(c) deciduous (d) coniferous
- (2) The evergreen rainforests in Brazil are called
(July '19)
(a) Mediterranean forest (b) lungs of the world
(c) coffee pot of the world (d) roca
- (3) In the swampy areas of Pantanal, huge are found.
(Sept. '21; March '24)
(a) Piranhas/Condor (b) Macaws/Pink Dolphins
(c) Anacondas (d) Snow leopard/Macaws
- (4) In the mixed forests at foothills of Himalayas, trees are found in plenty.
(July '22)
(a) Sal (b) Sundar (c) Khejri (d) Teak
- (5) In India, thorny vegetation is found in the state of
(a) Maharashtra (b) Goa (c) Rajasthan (d) Kerala
- (6) forests are seen in the northernmost part of India.
(a) Thorny (b) Deciduous (c) Himalayan (d) Evergreen
- (7) In the swampy and marshy lands of Assam, are found.
(July '23)
(a) Anaconda (b) one-horned rhinoceroses
(c) Macow (d) wild ass

Ans. (1) deciduous (2) lungs of the world (3) Anacondas (4) Teak
(5) Rajasthan (6) Himalayan (7) one-horned rhinoceroses.

CHAPTER 6 : POPULATION

- (1) Sex ratio means the number of females per males in a region.
(July '19)
(a) hundred (b) lakh (c) thousand (d) million
- (2) Populationwise, India is largest country in the world.
(Nov. '20)
(a) first (b) fifth (c) seventh (d) second

(3) Brazil is the populated country in the South American continent. **(March '23)**

(a) less (b) medium (c) very less (d) very high

(4) On the distribution of population, factor affects.

(March '24)

(a) physiographic

(b) sex ratio

(c) literacy

(d) life expectancy

(5) With reference to area, Brazil stands in the world. **(July '23)**

(a) fifth (b) seventh (c) first (d) ninth

(6) Areawise Brazil ranks in the world. **(March '25)**

(a) fifth (b) seventh (c) sixth (d) fourth

Ans. (1) thousand (2) second (3) very high (4) physiographic
(5) fifth (6) fifth.

CHAPTER 7 : HUMAN SETTLEMENTS

(1) The concentration of settlements is related to major factor. **(March '23)**

(a) proximity to the sea

(b) plain region

(c) availability of water

(d) climate

(2) In Narmada valley, type of settlements are found.

(July '22)

(a) linear

(b) dispersed

(c) nucleated

(d) star-shaped

(3) In northeastern part of Brazil, type of settlements are found,

(a) nucleated

(b) linear

(c) dispersed

(d) star-shaped

(4) Dispersed settlements are found in India.

(a) near the rivers

(b) near the transport routes

(c) in hilly areas

(d) in industrial regions

(5) Concentrated settlements are found in Narmada Valley because of

- (a) forested land (b) cultivable land
(c) undulating topography (d) industries

(6) state has the least urbanisation in Brazil.

- (a) Para (b) Amapa (c) Espirito Santo (d) Parana

Ans. (1) availability of water (2) nucleated (3) dispersed
(4) in hilly areas (5) cultivable land (6) Para.

CHAPTER 8 : ECONOMY AND OCCUPATIONS

(1) The economies of India and Brazil are of the type.
(July '19; March '22-'23)

- (a) underdeveloped/undeveloped
(b) developed
(c) developing
(d) highly developed

(2) In India, salt is produced on a large scale in the state of

- (a) Gujarat (b) Goa (c) Punjab (d) West Bengal

(3) India's per capita income is less than Brazil due to

- (a) low national income
(b) massive population
(c) big family size
(d) low food grain production

(4) The economy of Brazil is mainly dependent on the activities.
(March '25)

- (a) primary (b) secondary (c) tertiary (d) quaternary

(5) Brazil is the largest exporter of in the world.

- (a) mineral oil/corn (b) tea
(c) bajra/rice (d) coffee **(March '19; July '23)**

Ans. (1) developing (2) Gujarat (3) massive population
(4) tertiary (5) coffee.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

(1) In India, the railway network is relatively less dense in the state of **(Nov. '20)**

- (a) Uttar Pradesh (b) Maharashtra
(c) Tamil Nadu (d) Rajasthan

(2) In Brazil, a southwest flowing river is used for waterways. **(July '22)**

- (a) Puraguaco (b) Parnaiba
(c) Purus (d) Parana

(3) In Brazil, the telecommunication services are not well expanded in the region.

- (a) southern (b) central
(c) eastern (d) northwestern

(4) The most common method of transportation in Brazil is **(March '24)**

- (a) airways (b) waterways
(c) roadways (d) railways

(5) have been important in the growth of the Indian economy.

- (a) Waterways (b) Airways
(c) Roadways (d) Railways

Ans. (1) Rajasthan (2) Parana (3) northwestern (4) roadways

(5) Railways.

**Question
Set
2**

**IDENTIFY THE CORRELATION AND
COMPLETE THE CHAIN**

[Q. 1 : Total Marks 4]

Q. Identify the correlation and complete the chain :

(4 items; 1 mark each)

Remember : (1) Four questions will be given in the question paper.
(2) Find out the correlation between the items given in each question and complete the chain.

CHAPTER 2 : LOCATION AND EXTENT

- (1) The states in Brazil from north to south : Para – Amapa – Sao Paulo – Santa Catarina
- (2) The states in India from south to north : Jammu and Kashmir – Maharashtra – Kerala – Karnataka

Ans. (1) The states in Brazil from north to south direction : Amapa – Para – Sao Paulo – Santa Catarina.

- (2) The states in India from south to north direction : Kerala – Karnataka – Maharashtra – Jammu and Kashmir.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

- (1) Physiographic divisions of Brazil from northeast to southeast : Brazilian Highlands – The Great Escarpment – Guyana Highlands – Amazon Plains.
- (2) Physiographic divisions of India from north to south : Deccan Plateau – The Vindhyas – The Himalayas – The Northern Plains.

Ans. (1) Physiographic divisions of Brazil from northeast to southeast : Guyana Highlands – Amazon Plains – Brazilian Highlands – The Great Escarpment.

- (2) Physiographic divisions of India from north to south : The Himalayas – The Northern Plains – The Vindhyas – Deccan Plateau.

Q. Identify the correct group : (4 items; 1 mark each)

Remember : (1) Four questions will be given in the question paper.
(2) Find out the correct group from each question and write it as answer.

CHAPTER 2 : LOCATION AND EXTENT

- (1) The states in Brazil.
- (a) Parana, Punjab, Acre
 - (b) Amapa, Arunachal Pradesh, Roraima
 - (c) Sao Paulo, Amazonas, Mato Grosso
- (2) The states in India.
- (a) Maharashtra, Gujarat, Amapa
 - (b) Manipur, Kerala, Alagoas
 - (c) Madhya Pradesh, Sikkim, Telangana

Ans.

- (1) The states in Brazil : (c) Sao Paulo, Amazonas, Mato Grosso.
- (2) The states in India : (c) Madhya Pradesh, Sikkim, Telangana.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

- (1) The rivers in India.
- (a) Yamuna, Ghaghara, Nigro
 - (b) Uruguay, Ganga, Ravi.
 - (c) Sutlej, Sabarmati, Narmada
- (2) The physiographic divisions of Brazil.
- (a) Guyana Highlands, Amazon River Basin, The Great Escarpment
 - (b) Brazilian Highlands, Himalayas, Northern Plains
 - (c) Andaman Islands, Nicobar Islands, Guyana Highlands

(3) These rivers of Brazil are north flowing : **(July '19)**

- (a) *Juruika, Xingu, Aragua*
- (b) *Negro, Branco, Paru*
- (c) *Japura, Jarua, Purus*

Ans.

- (1) The rivers in India : (c) *Sutlej, Sabarmati, Narmada.*
- (2) The physiographic divisions of Brazil : (a) *Guyana Highlands, Amazon River Basin, The Great Escarpment.*
- (3) These rivers of Brazil are north flowing : (a) *Juruika, Xingu, Aragua.*

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

(1) Airports in Brazil.

- (a) *Curitiba, Mumbai, Pune*
- (b) *Rio Grande, Cuiaba, Porto Alegre*
- (c) *Campo Grande, Pune, Bengaluru*

(2) Ports in India.

- (a) *Mumbai, Goa, Kolkata*
- (b) *Kolkata, Manaus, Vitoria*
- (c) *Chennai, Kochin, Rio Grande*

Ans.

- (1) Airports in Brazil : (b) *Rio Grande, Cuiaba, Porto Alegre.*
 - (2) Ports in India : (a) *Mumbai, Goa, Kolkata.*
-

**Question
Set
4**

MATCH THE CORRECT PAIRS

[Q. 2 : Total Marks 4]

Q. Match the columns and rewrite : (4 items; 1 mark each)

Remember : (1) There will be five/six options in column 'B' to match four items with column 'A'. (2) Write the word from column 'A' and write matching word from column 'B' against it. (3) While answering, remember the important facts and figures from each chapter and match the pairs correctly.

(1) Column 'A'	Column 'B' (Ch. 1)
(1) Field visit (July '22 - '23)	(a) Important item for field visit
(2) Notebook	(b) Follow the instructions of the teacher/Questionnaire
(3) Permission letter	(c) Geographical study
(4) Purpose of field visit	(d) Entertainment
	(e) Preparation for field visit

Ans. (1) Field visit – Follow the instructions of the teacher/Questionnaire (2) Notebook – Important item for field visit (3) Permission letter – Preparation for field visit (4) Purpose of field visit – Geographical study.

(2) Column 'A'	Column 'B' (Ch. 2)
(1) Football	(a) Samba dance
(2) Brazil (July '22)	(b) Brasilia
(3) National capital of India	(c) Popular game of Brazil
(4) Capital of Brazil (July '23)	(March '23)
	(d) Famous dance form in India
	(e) New Delhi

Ans. (1) Football – Popular game of Brazil (2) Brazil – Samba dance (3) National capital of India – New Delhi (4) Capital of Brazil – Brasilia.

(3) Column 'A'	Column 'B' (Ch. 3)
(1) Plain region (March '23)	(a) Guyana
(2) Swampy region	(b) Highest peak in Brazil
(3) Highlands (July '23)	(c) Punjab
(4) Pico-de-Neblina	(d) Goa
(March '22)	(e) Pantanal

Ans. (1) Plain region – Punjab (2) Swampy region – Pantanal
(3) Highlands – Guyana (4) Pico-de-Neblina – Highest peak in Brazil.

(4) Column 'A'	Column 'B' (Ch. 4)
(1) Climate of India (July '22)	(a) Desert region
(2) Rajasthan	(b) Region of low rainfall
(3) Western Ghat	(c) Coastal region
(4) Alagoas	(d) Monsoon type
	(e) Region of high rainfall

Ans. (1) Climate of India – Monsoon type (2) Rajasthan – Desert region (3) Western Ghat – Region of high rainfall (4) Alagoas – Region of low rainfall.

(5) Column 'A'	Column 'B' (Ch. 5)
(1) Thorny and bush type vegetation (March '23)	(a) Sundari trees
(2) Deciduous forests	(b) Pine
(3) Coastal forests	(c) Pau Brasil
(4) Himalayan forests	(d) Teak
	(e) Orchid
	(f) Khejadi

Ans. (1) Thorny and bush type vegetation – Khejadi (2) Deciduous forests – Teak (3) Coastal forests – Sundari trees (4) Himalayan forests – Pine.

(6) Column 'A'	Column 'B' (Ch. 6)
(1) Densely populated state in Brazil (July '22)	(a) Uttarakhand
(2) Sparsely populated state in India	(b) Dense network of transport
(3) Ganga river basin	(c) Important resource
(4) Population	(d) Sao Paulo
	(e) Amapa

Ans. (1) Densely populated state in Brazil – Sao Paulo (2) Sparsely populated state in India – Uttarakhand (3) Ganga river basin – Dense network of transport (4) Population – Important resource.

(7) Column 'A'	Column 'B' (Ch. 7)
(1) Highest Urbanisation (July '23) / Most urbanised state (March '22)	(a) Nucleated settlements
(2) Narmada Valley	(b) Urban settlement in earlier time in India
(3) Mithila	(c) Goa
(4) Ceara	(d) Rajasthan
	(e) Drought-prone state in Brazil

Ans. (1) Highest Urbanisation/Most urbanised state – Goa (2) Narmada Valley – Nucleated settlements (3) Mithila – Urban settlement in earlier time in India (4) Ceara – Drought-prone state in Brazil.

(8) Column 'A'	Column 'B' (Ch. 9)
(1) Trans-Amazonian Highway (March '23)	(a) Tourist place
(2) Road transport	(b) Railway station in India
(3) Rio de Janeiro (March '22)	(c) Golden Quadrilateral Highway
(4) Manmad	(d) Major Highways
	(e) 40° W. Meridian

Ans. (1) Trans-Amazonian Highway – Major Highways (2) Road transport – Golden Quadrilateral Highway (3) Rio de Janeiro – Tourist place (4) Manmad – Railway station in India.

**Question
Set
5**

IDENTIFY THE ODD MAN OUT

[Q. 2 : Total Marks 4]

Q. Identify the odd man out from the given items and write the same : **(4 items; 1 mark each)**

Remember : (1) Four items with four alternatives each will be given in the question paper. (2) Find out the wrong/odd alternative for each item and write it in the answer sheet.

CHAPTER 1 : FIELD VISIT

(1) Main purpose of field visit. **(Nov. '20)**

(a) Geographical (b) Historical

(c) Entertainment (d) Cultural

(2) Items required/materials to be carried for field visit.

(Sept. '21; March '25)

(a) Notebook/Questionnaire (b) Camera

(c) Map (d) Microscope/computer

Ans. (1) – (c) : Entertainment, (2) – (d) : Microscope/computer.

CHAPTER 2 : LOCATION AND EXTENT

(1) States in India. **(March '19)**

(a) Madhya Pradesh (b) Maharashtra

(c) Meghalaya (d) Maranhao

(2) Neighbouring countries of India.

(a) Nepal (b) Bhutan

(c) Pakistan (d) Suriname

(3) Coastal states in Brazil. **(March '24)**

(a) Rio de Janeiro (b) Paraiba

(c) Amapa (d) Acre

Ans. (1) – (d) : Maranhao, (2) – (d) : Suriname, (3) – (d) : Acre.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

(1) Rivers in Brazil. **(March '25)**

(a) Amazon (b) Paraguay (c) Uruguay (d) Ganga

(2) The states of Brazil in which spread of Brazilian Highlands is found.

(a) Amapa (b) Sao Paulo
(c) Goias (d) Bahia

(3) Tributary of river Amazon. **(March '24)**

(a) Paru river (b) Purus river
(c) Parana river (d) Juruika river

Ans. (1) – (d) : Ganga, (2) – (a) : Amapa, (3) – (c) : Parana river.

CHAPTER 4 : CLIMATE

(1) Region with very high rainfall in India. **(March '24)**

(a) Western part of Rajasthan (b) Western Ghats
(c) Meghalaya Plateau (d) Arunachal Pradesh

(2) State/Union Territory with low rainfall in India.

(a) Gujarat (b) Rajasthan
(c) Ladakh (d) Meghalaya

Ans. (1) – (a) : Western part of Rajasthan, (2) – (d) : Meghalaya.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

(1) Forest type of Brazil. **(Nov. '20)**

(a) Thorny bush type vegetation
(b) Evergreen forests
(c) The Himalayan forests
(d) Deciduous forests

(2) With reference to flora of India.

(March '19; July '19; Sept. '21)

(a) Deodar (b) Anjan (c) Orchid (d) Banyan

(3) Animals found in the Peninsular region of India. **(March '24)**

(a) Indian Bisons (b) Deer (c) Antelopes (d) Yaks

Ans. (1) – (c) : The Himalayan forests, (2) – (c) : Orchid,

(3) – (d) : Yaks.

CHAPTER 6 : POPULATION

(1) Favourable factors affecting population distribution.

(March '19)

- (a) Nearness to sea (b) Lack of roads
(c) Cultivable land (d) New cities and towns

(2) Sparsely populated states in India.

- (a) Uttar Pradesh (b) Himachal Pradesh
(c) Uttarakhand (d) Arunachal Pradesh

Ans. (1) – (b) : Lack of roads, (2) – (a) : Uttar Pradesh.

CHAPTER 7 : HUMAN SETTLEMENTS

(1) The concentration of settlements is related to the following major factor.

(Sept. '21)

- (a) Desert region (b) Plain region
(c) Availability of water (d) Favourable climate

(2) Favourable factors for concentration of settlements.

(March '25)

- (a) Availability of water (b) Unfavourable climate
(c) Fertile land (d) Favourable climate

Ans. (1) – (a) : Desert region, (2) – (b) : Unfavourable climate.

CHAPTER 8 : ECONOMY AND OCCUPATIONS

(1) Crops in Brazil.

(Nov. '20)

- (a) Cocoa (b) Coffee (c) Soyabean (d) Jowar

(2) Commercial crop of Brazil.

(Sept. '21)

- (a) Coffee (b) Soyabean (c) Rubber (d) Maize

(3) Salt producing state in India.

(Nov. '20)

- (a) Gujarat (b) Rajasthan (c) Bihar (d) Tamil Nadu

(4) Members of BRICS.

(March '19)

- (a) Brazil (b) India (c) China (d) Saudi Arabia

(5) Primary activities.

(March '25)

- (a) Agriculture (b) Mining (c) Tourism (d) Fishing

Ans. (1) – (d) : Jowar, (2) – (d) : Maize, (3) – (c) : Bihar,

(4) – (d) : Saudi Arabia, (5) – (c) Tourism.

**Question
Set
6**

ARRANGE THE SENTENCES

[Q. 2 : Total Marks 4]

Q. Arrange the sentences in correct sequence :

(4 questions; 1 mark each)

Remember : (1) Four questions will be given in the question paper.
(2) Sentences given in all four questions are to be arranged correctly and answers to all four questions are to be written.

CHAPTER 1 : FIELD VISIT

Q. Preparing for field visit :

(July '19)

- (A) Visit to a location of field visit.
- (B) Selection of a place for field visit.
- (C) Report writing
- (D) Pre-preparation for a field visit

Options : (i) (B), (D), (A), (C) (ii) (C), (A), (B), (D)
(iii) (D), (A), (B), (C) (iv) (A), (B), (C), (D)

Ans. Statements in correct sequence – (i) (B), (D), (A), (C).

CHAPTER 6 : POPULATION

Q. Population distribution in Ganga River Basin.

- (A) Ganga River Basin has fertile land.
- (B) Population density is high in Ganga River Basin.
- (C) Agriculture and industries are well developed in Ganga River Basin.
- (D) Ganga River Basin receives moderate amount of rainfall.

Options : (i) (B), (C), (D), (A) (ii) (A), (B), (C), (D)
(iii) (D), (B), (A), (C) (iv) (D), (A), (C), (B)

Ans. Statements in correct sequence – (iv) (D), (A), (C), (B).

**Question
Set
7**

COMPLETE THE SERIES

[Q. 2 : Total Marks 4]

Q. Match the items from columns 'A', 'B' and 'C' and complete the series :
(4 items; 1 mark each)

Remember : (1) Four items each will be given in column 'A', 'B' and 'C'. (2) Write the word from column 'A' and write matching words from columns 'B' and 'C' and complete the series.

(1) Column 'A'	Column 'B'	Column 'C' (Ch. 3)
(1) Western coastal region of India	(a) Comparatively broader	(i) Young fold mountains
(2) Eastern coastal region of India	(b) Fertile soil	(ii) Deltas
(3) Mountainous region of India	(c) Comparatively narrower	(iii) Development of agriculture
(4) Plains in India	(d) Himalayas	(iv) Estuaries

Ans. (1) Western coastal region of India – Comparatively narrower – Estuaries (2) Eastern coastal region of India – Comparatively broader – Deltas (3) Mountainous region of India – Himalayas – Young fold mountains (4) Plains in India – Fertile soil – Development of agriculture.

(2) Column 'A'	Column 'B'	Column 'C' (Ch. 8)
(1) Food crop in Brazil	(a) Cacao	(i) Southeastern region
(2) Cash crop in Brazil	(b) Corn	(ii) Southern region
(3) Mineral product in Brazil	(c) Tea	(iii) Central part
(4) Cash crop in India	(d) Manganese	(iv) Southeastern coastal region

Ans. (1) Food crop in Brazil – Corn – Central part (2) Cash crop in Brazil – Cacao – Southeastern coastal region (3) Mineral product in Brazil – Manganese – Southeastern region (4) Cash crop in India – Tea – Southern region.

**Question
Set
8**

IDENTIFY THE INCORRECT PAIR

[Q. 2 : Total Marks 4]

Q. Identify the incorrect pair for each item :

(4 items; 1 mark each)

Remember : (1) Four items will be given in the question paper. (2) For each item four pairs will be given. Identify the incorrect pair and write the same in answer sheet.

CHAPTER 2 : LOCATION AND EXTENT

- Q.** (a) State in northern region of India – Himachal Pradesh
(b) State in western region of India – Rajasthan
(c) State in eastern region of India – Maharashtra
(d) State in southern region of India – Kerala

Ans. Incorrect pair : (c) State in eastern region of India – Maharashtra.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

- Q.** (a) Himalayas – Major water divide of India
(b) Daman – Union territory of India
(c) Thar – Desert area of Brazil
(d) Pantanal – Swampy land of Brazil

Ans. Incorrect pair : (c) Thar – Desert area of Brazil.

CHAPTER 4 : CLIMATE

- Q.** (a) Western Ghats – Region of low rainfall in India
(b) Drought Quadrilateral – Rain shadow region in Brazil
(c) Eastern Himalayas – Region of high rainfall in India
(d) Amazon River Basin – Region of high rainfall in Brazil

Ans. Incorrect pair : (a) Western Ghats – Region of low rainfall in India.

CHAPTER 6 : POPULATION

9. (a) Country with higher proportion of old people – Brazil
(b) Sparsely populated state in India – Uttar Pradesh
(c) Densely populated region of Brazil – Southeastern coastal region
(d) Country with higher population of youth – India

Ans. Incorrect pair : (b) Sparsely populated state in India – Uttar Pradesh.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

9. (a) Itarsi – Railway station in India
(b) Manaus – Port in Brazil
(c) Leh – Airport in India
(d) Guwahati – Tourist place in Brazil

Ans. Incorrect pair : (d) Guwahati – Tourist place in Brazil.

**Very Useful Books for practice
of writing answers and attending
Map-based Question**

**VIKAS GEOGRAPHY SMART
WORKBOOK : Std. X**

**VIKAS FINDING LOCATION : STD. X
(Activities And Projects)**

Q. Answer the following questions in one sentence each :

(4 out of 5 questions; 1 mark each)

Remember : (1) Five questions will be given in question paper. (2) Students are expected to answer any four of them. (3) Remember that this question is objective type. So answer to this question should be strictly in one sentence each only.

CHAPTER 1 : FIELD VISIT

(1) What is field visit?

Ans. Collecting geographical and cultural information by actually paying a visit to a particular place is called 'field visit'.

(2) What types of information of a field can be collected by field visit?

Ans. Geographical, social, economic, historical, cultural, etc. types of information of a field can be collected by field visit.

CHAPTER 2 : LOCATION AND EXTENT

(1) Areawise, which is the largest state in India? (March '22)

Ans. Areawise, Rajasthan is the largest state in India.

(2) In which Hemispheres is India situated?

Ans. India is situated in both the Northern Hemisphere and the Eastern Hemisphere.

(3) In which Hemispheres is Brazil situated?

Ans. Brazil is situated in the Northern, Southern and Western Hemispheres.

(4) The country Brazil is famous for which type of dance?

(July '23)

Ans. The country Brazil is famous for Samba dance.

(5) Brazil is mainly located in which hemisphere? (Nov. '20)

Ans. Brazil is mainly located in southern hemisphere.

(6) Which is the popular sport of Brazil? (March '22)

Ans. Football is the popular sport of Brazil.

(7) Which country has a high proportion of young population? (July '23)

Ans. India has a high proportion of young population.

(8) By which name is the southernmost point of India known?

Ans. The southernmost point of India is known as Indira Point.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

(1) Which is the highest peak in Brazil? (Nov. '20)

Ans. Pico de Neblina is the highest peak in Brazil.

(2) Which major river systems are included in Himalayan drainage?

Ans. Sindhu river system and Ganga river system are included in Himalayan drainage.

(3) From where does Ganga river originate?

Ans. Ganga river originates at Bhagirathi (at Gangotri) from Alaknanda glacier.

(4) By which names is the desert region of Rajasthan known?

Ans. The desert region of Rajasthan is known as 'Thar desert' or 'Marusthali'.

(5) Write the name of the largest delta of the world.

(July '23)

Ans. The name of the largest delta of the world is Sundarban.

(6) From where does Amazon river originate?

Ans. Amazon river originates from the eastern slopes of Andes Mountains in Peru.

(7) How many kilometres of a coastline does India have?

Ans. India has a coastline of about 7500 kilometres.

(8) How many kilometres of a coastline does Brazil have?

Ans. Brazil has a coastline of about 7400 kilometres.

CHAPTER 4 : CLIMATE

(1) What is rainshadow region in Brazil called? (March '22)

Ans. Rainshadow region in Brazil is called as 'Drought Quadrilateral'.

(2) Which type of climate is found to the south of the Tropic of Capricorn in Brazil?

Ans. Temperate type of climate is found to the south of the Tropic of Capricorn in Brazil.

(3) In which part of Brazil does less variations in temperature found?

Ans. Less variations in temperature is found in the equatorial region at coastal part in Brazil.

(4) What is the average rainfall in the Amazon river basin?

Ans. The average rainfall in the Amazon river basin is about 2000 mm.

(5) By which name is the northeast part of Brazil known?

Ans. The northeast part of Brazil is known as 'Drought Quadrilateral'.

(6) Which form of rain is found in Himalayan region?

Ans. Orographic type of rain is found in Himalayan region.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

(1) Which is the national animal of India?

Ans. Tiger is the national animal of India.

(2) For which animal is the state of West Bengal famous?

Ans. The state of West Bengal is famous for tiger.

(3) Which region of Brazil receives rainfall throughout the year?

Ans. Equatorial region of Brazil receives rainfall throughout the year.

(4) By which name are the rainforests in Brazil known as?

Ans. Rainforests in Brazil are known as 'lungs of the world'.

CHAPTER 6 : POPULATION

(1) What is sex ratio?

(Nov. '20)

Ans. Sex ratio is the number of females per 1000 males in population.

(2) What is average life expectancy?

Ans. Average life expectancy is the number of years a person could expect to live since its birth.

(3) How many per cent of the world's total land is occupied by India?

Ans. Nearly 2.41 per cent of the world's total land is occupied by India.

(4) How many per cent of the world's total population is in India?

Ans. Nearly 17.5 per cent of the world's total population is in India.

CHAPTER 7 : HUMAN SETTLEMENTS

(1) Which factors lead to variety of settlements?

Ans. The factors like climate, availability of water, slope of land, fertility of land, level of development, etc. lead to variety of settlements.

(2) Which type of settlements are found in the North Indian Plains?

(Nov. '20)

Ans. Nucleated settlements are found in the North Indian Plains.

(3) Which is the most urbanised state in India?

(Nov. '20)

Ans. Goa is the most urbanised state in India.

(4) What type of settlements are found in the central part of India?

Ans. Dispersed settlements are found in the central part of India.

(5) In which river basins in India are the nucleated settlements seen?

Ans. The nucleated settlements in India are seen in the river basins of Ganga, Narmada, Godavari, Kaveri, etc.

(6) Which rivers meet near Manaus in Brazil?

Ans. Negro river and Amazon river meet near Manaus in Brazil.

(7) Name the country which is promoting "Go West" policy.

(July '23)

Ans. The name of the country promoting "Go West" policy is Brazil.

CHAPTER 8 : ECONOMY AND OCCUPATIONS

(1) Which currency is mainly used for international trade?

Ans. US dollar is the currency mainly used for international trade.

(2) What type of agriculture is mainly practised in India?

(March '22)

Ans. Subsistence agriculture is mainly practised in India.

(3) Which type of economy exists in Brazil?

Ans. Mixed economy exists in Brazil.

(4) At which places in India is the fresh water fishing carried out?

Ans. In India, the fresh water fishing is carried out in rivers, canals, irrigation channels, tanks, ponds, lakes, etc.

(5) Which countries are the major trading partners of Brazil?

Ans. Germany, USA, Canada, Italy, Argentina, Saudi, India, etc. countries are the major trading partners of Brazil.

(6) Which countries are the major trading partners of India?

Ans. UK, USA, Germany, Japan, China, Russia, Brazil, etc. countries are the major trading partners of India.

(7) Which type of occupations give a boost to the development of a country's economy?

Ans. Tertiary type of occupations give a boost to the development of a country's economy.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

(1) Which longitude in India is considered as Indian Standard Time?

(March '22)

Ans. 82° 30' E longitude in India is considered as Indian Standard Time.

(2) How many 'Time Zones' are considered in Brazil?

(July '23)

Ans. Four 'Time Zones' are considered in Brazil.

(3) Which is the cheapest mode of transport?

Ans. Waterways is the cheapest mode of transport.

(4) Through which city does the standard time meridian of India pass?

Ans. The standard time meridian of India passes through Allahabad city.

**Question
Set
10**

NAME THE FOLLOWING

[Q. 3 : Total Marks 4]

Q. Name the following : (4 out of 5 items; 1 mark each)

Remember : (1) Five items will be given in question paper. (2) Answer any four of them.

CHAPTER 2 : LOCATION AND EXTENT

(Note : The answers are given directly.)

(1) Any four states in India : (1) Maharashtra (2) Gujarat
(3) Jammu and Kashmir (4) Manipur.

(2) Countries sharing land boundaries with India : (1) Pakistan
(2) Afghanistan (3) China (4) Nepal (5) Bhutan (6) Bangladesh
(7) Myanmar.

(3) Countries sharing maritime border with India : (1) Pakistan
(2) Sri Lanka (3) Maldives (4) Indonesia (5) Bangladesh (6) Myanmar.

(4) Any four states in Brazil : (1) Acre (2) Amapa (3) Alagoas
(4) Goias.

(Note : Any four names are expected in the answer.)

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

(1) Main tributaries of river Ganga : (1) Yamuna (2) Ramganga
(3) Ghaghara (4) Gandak (5) Kosi.

(2) Tributaries of river Ganga flowing from peninsular region of India : (1) Chambal (2) Ken (3) Betwa (4) Shon.

(3) Tributaries of river Sindhu in India : (1) Sutlej (2) Beas
(3) Ravi (4) Chenab (5) Jhelam.

(4) Rivers flowing into the Gulf of Khambhat : (1) Tapi
(2) Narmada (3) Mahi (4) Sabarmati.

CHAPTER 4 : CLIMATE

(1) States/Regions of high rainfall in India : (1) Western Ghats
(2) Himalayas (3) Goa (4) Eastern Maharashtra.

(2) States/Regions of high rainfall in Brazil : (1) Amazonas
(2) Rio Grande do Sul.

(3) States/Regions of moderate rainfall in India : (1) West Bengal
(2) Western Andhra Pradesh.

(4) States/Regions of moderate rainfall in Brazil : (1) Santa Catarina
(2) Roraima.

(5) States/Regions of low rainfall in India : (1) Bihar
(2) Western part of Rajasthan (3) Gujarat.

(6) States/Regions of low rainfall in Brazil : (1) Tocantins
(2) Pernambuco (3) Alagoas (4) Rio Grande Do Norte (5) Paraiba.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

(1) Trees found in evergreen forests in India : (1) Mahogany
(2) Rosewood (3) Rubber (4) Sandalwood, etc.

(2) Trees found in deciduous forests in India : (1) Teak
(2) Bamboo (3) Banyan (4) Peepal, etc.

(3) Thorny and shrub-type vegetation found in India :
(1) Catechu (2) Acacia (3) Khejri (4) Aloe vera (5) Agave, etc.

(4) Trees found in Himalayan forests located at medium altitude : (1) Pine (2) Deodar (3) Fir (4) Spruce, etc.

(5) Trees found in Brazil : (1) Pau Brasil (2) Rubber
(3) Mahogany (4) Rosewood (5) Orchids, etc.

(6) Animals found in India : (1) Elephants (2) One-horned rhinoceroses (3) Wild ass (4) Camel (5) Snow leopard (6) Yaks
(7) Indian bison (8) Deer (9) Antelopes (10) Tigers (11) Lions
(12) Monkeys (13) Turtles (14) Crocodiles (15) Gharials, etc.

(7) Birds found in India : (1) Peacocks (2) Indian bustard
(3) Kingfishers (4) Peasants (5) Ducks (6) Parakeets (7) Cranes
(8) Pigeons, etc.

(8) States/Regions of tropical forests in India : (1) Andaman and Nicobar islands (2) Western Ghats (3) Assam.

CHAPTER 6 : POPULATION

(1) Densely populated cities in India : (1) Mumbai (2) Pune (3) Chennai (4) Kolkata (5) Delhi (6) Bengaluru, etc.

(2) Sparsely populated states in Brazil : (1) Roraima (2) Amazonas (3) Amapa (4) Acre, etc.

(3) Densely populated states in Brazil : (1) Sao Paulo (2) Rio de Janeiro (3) Parana (4) Santa Catarina, etc.

(4) Densely populated states in India : (1) Uttar Pradesh (2) Bihar (3) West Bengal (4) Kerala (5) Tamil Nadu, etc.

(5) Sparsely populated states in India : (1) Jammu and Kashmir (2) Himachal Pradesh (3) Uttarakhand (4) Arunachal Pradesh.

CHAPTER 7 : HUMAN SETTLEMENTS

(1) Types of human settlements : (1) Nucleated (2) Linear (3) Dispersed (4) Star-shaped, etc.

(2) Urban settlements in earlier times in India :
(1) Indraprastha (Delhi) (2) Mithila (3) Varanasi (4) Harappa (5) Mohenjo Daro (6) Ujjain (7) Pratishthan (Paithan), etc.

(3) Drought-prone states in Brazil : (1) Pernambuco (2) Sergipe (3) Alagoas (4) Paraiba (5) Ceara (6) Piaui.

CHAPTER 8 : ECONOMY AND OCCUPATIONS

(1) The main crops grown in various parts of Brazil : (1) Coffee (2) Rice (3) Soyabean (4) Corn (5) Sugarcane (6) Cacao (7) Rubber (8) Banana (9) Orange (10) Pineapple, etc.

(2) The main minerals found in various parts of Brazil :
(1) Iron ore (2) Manganese (3) Coal (4) Bauxite (5) Copper, etc.

(3) The fish caught from marine fishing in Brazil : (1) Swordfish (2) Shrimps (3) Lobsters (4) Sardines, etc.

(4) The fish caught from coastal fishing in Arabian Sea in India : (1) Sardines (2) Mackerel (3) Bombay duck (4) Prawns, etc.

(5) The states of India in which fish forms an important part of diet : (1) Maharashtra (2) Goa (3) Kerala (4) Tamil Nadu (5) Odisha (6) West Bengal, etc.

(6) The states of India having deposits of minerals : (1) Jharkhand (2) Odisha (3) Chhattisgarh (4) Madhya Pradesh (5) Rajasthan (6) Karnataka (7) Tamil Nadu (8) Maharashtra, etc.

(7) Places of mineral oil refineries in India : (1) Koyali (2) Digboi (3) Noonmati (4) Bongaigaon (5) Barauni (6) Mathura, etc.

(8) The goods included in the import of Brazil : (1) Machinery (2) Chemical products (3) Fertilizers (4) Wheat (5) Heavy vehicles (6) Mineral oil (7) Lubricants, etc.

(9) The goods included in the export of Brazil : (1) Coffee (2) Cacao (3) Soyabean (4) Cotton (5) Sugar (6) Oranges (7) Bananas (8) Tobacco (9) Iron ore.

(10) The goods included in the import of India : (1) Petroleum (2) Machines (3) Pearls (4) Precious stones (5) Gold (6) Silver (7) Papers (8) Medicines, etc.

(11) The goods included in the export of India : (1) Tea (2) Coffee (3) Spices (4) Leather (5) Leather goods (6) Iron ore (7) Cotton (8) Silk textiles (9) Mangoes, etc.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

(1) The modes of transport in India : (1) Waterways (2) Roadways (3) Railways (4) Airways.

(2) The major railway junctions in India : (1) Mumbai (2) Delhi (3) Kanpur (4) Nagpur (5) Chandigarh.

(3) Major ports in Brazil : (1) Rio Grande (2) Rio de Janeiro (3) Vitoria (4) Salvador (5) Manaus.

(4) The major airports in Brazil : (1) Cuiaba (2) Campo Grande (3) Rio Grande (4) Curitiba (5) Porto Alegre.

**Question
Set
11**

SAY RIGHT OR WRONG

[Q. 3 : Total Marks 4]

Q. Say the sentences right or wrong :

(4 out of 5 sentences; 1 mark each)

Remember : (1) Five sentences will be given in the question paper.
(2) Students are expected to write Right or Wrong for any four of them.

CHAPTER 1 : FIELD VISIT

- (1) During field visit, vegetation is not the indicator of difference in precipitation. **(March '19)**
- (2) During field visit, the information can be obtained by interviewing local people.
- (3) Regions and necessities influence the difference in the means of livelihood.
- (4) Vegetation is an indicator of difference in precipitation.

Ans. (1) Wrong (2) Right (3) Right (4) Right.

CHAPTER 2 : LOCATION AND EXTENT

- (1) Brazil is mainly located in the Southern Hemisphere. **(March '19)**
- (2) Tropic of Capricorn passes through the middle of India. **(Sept. '21)**
- (3) The longitudinal extent of Brazil is less than India.
- (4) Equator passes through the northern part of Brazil.
- (5) The proportion of youth in India's population is high.

Ans. (1) Right (2) Wrong (3) Wrong (4) Right (5) Right.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

- (1) The river Ganga originates from the Yamunotri glacier. **(March '19)**
- (2) River Sutlej is a major tributary of river Indus. **(Sept. '21)**
- (3) Sundarbans is the largest delta region in the world.
- (4) The slope of Punjab plains is towards east.

(5) The Great Escarpment is located in the northern part of Brazil.

Ans. (1) Wrong (2) Right (3) Right (4) Wrong (5) Wrong

CHAPTER 4 : CLIMATE

(1) The fact that Brazil lies on the equator affects its climate in a big way.

(2) Temperature in Ganganagar in Rajasthan rises to 30°C in June.

(3) India faces tropical cyclones frequently.

(4) Brazil gets a lot of rainfall because of the southwest monsoon winds.

(5) In Mumbai, the average temperature in the month of May is around 15°C.

(6) Manaus city in Brazil receives the highest rainfall in the month of March.

(7) India and Brazil have the same seasons at the same time.

(March '25)

Ans. (1) Right (2) Wrong (3) Right (4) Wrong (5) Wrong
(6) Right (7) Wrong.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

(1) Brazil does not have the large number of vegetation species in the world.

(Sept. '21)

(2) Brazil is the only country in the world where both tigers and lions are found.

(March '25)

Ans. (1) Wrong (2) Wrong.

CHAPTER 6 : POPULATION

(1) The western part of Brazil is densely populated. **(March '19)**

(2) In India, population is very unevenly distributed. **(Sept. '21)**

(3) The sex ratio is high in Brazil.

(March '25)

(4) In Brazil, people prefer living in the southeast as compared to the northeast.

(5) The life expectancy of Indians is decreasing.

(6) The north-western part of India is densely populated.

(7) West Bengal state of India is sparsely populated.

(8) Acre state of Brazil is sparsely populated.

Ans. (1) Wrong (2) Right (3) Right (4) Right (5) Wrong
(6) Wrong (7) Wrong (8) Right.

CHAPTER 7 : HUMAN SETTLEMENTS

(1) Nucleated settlements are found on the Himalayan slopes.

(2) Nucleated settlements are found on Vindhyan Plateau.

(3) Tea is cultivated on a large scale in the fertile land of Sao Paulo.

(4) Northeastern region of Brazil is a region of heavy rainfall.

(5) The climate in the equatorial dense forest region in Brazil is healthy.

Ans. (1) Wrong (2) Right (3) Wrong (4) Wrong (5) Wrong.

CHAPTER 8 : ECONOMY AND OCCUPATIONS

(1) Like the Indian economy, the Brazilian economy is also of mixed type. **(March '19)**

(2) Compared to Brazil, the national income of India is high.

(3) Compared to Brazil, the national per capita income of India is high.

(4) In Brazil, fishing is carried out on a large scale in fresh water.

(5) In India, the state of Rajasthan is famous for Cuddapah.

(6) Jute industry is concentrated in the state of West Bengal.

Ans. (1) Right (2) Right (3) Wrong (4) Wrong (5) Wrong
(6) Right.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

(1) Ecotourism is being developed in Brazil. **(Sept. '21)**

(2) Tourism is a visible trade.

(3) Brazil's time zone is ahead of India's time.

(4) Manaus is a port on the confluence of Negro and the Amazon.

(March '25)

Ans. (1) Right (2) Wrong (3) Wrong (4) Right.

**Question
Set
12**

IDENTIFY THE TYPE

[Q. 3 : Total Marks 4]

Q. Identify the type from the given sentences :

(4 out of 5 questions; 1 mark each)

Remember : (1) Five questions will be given in the question paper.
(2) Types from any four sentences are to be identified correctly and to be written.

CHAPTER 4 : CLIMATE

- (1) A type of rainfall that occurs again in Chennai and other southern regions of India.
(2) A type of rainfall that occurs in the equatorial region due to high temperature.

Ans. (1) Retreating monsoon (2) Convectional rainfall.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

- (1) A type of forest in Brazil that is known as 'lungs of the world'.
(2) A type of agriculture in Brazil resulting into loss of shelter for animals.

Ans. (1) Evergreen forests (2) Roka.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

- (1) A type of transport mode that has dense network in the northern part of India.
(2) A type of tourism that maintains the balance of environment.

Ans. (1) Railway (2) Ecotourism.

**Question
Set
13**

DIFFERENTIATE BETWEEN

[Q. 3 : Total Marks 4]

Q. Differentiate between the following :

(2 out of 3 Differences; 2 marks each)

Remember : (1) Three questions for differentiating between will be given in the question paper. (2) Write answer to two questions of differentiating between. (3) Two points of differences are expected in each answer.

CHAPTER 2 : LOCATION AND EXTENT

(1) Location of India and Location of Brazil :

Location of India	Location of Brazil
1. India is located completely in the Northern and Eastern Hemispheres.	1. Brazil is located in the Northern, Southern and Western Hemispheres.
2. India is located in the southern part of the continent of Asia.	2. Brazil is located in the northern part of the continent of South America.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

(2) Western Coastal Region of India and Eastern Coastal Region of India :

Western Coastal Region of India	Eastern Coastal Region of India
1. Western Coastal region of India borders the Arabian Sea.	1. Eastern Coastal region of India borders the Bay of Bengal.
2. Rivers form estuaries in the western coastal region of India.	2. Rivers form deltas in the eastern coastal region of India.

(3) Western Ghats and Eastern Ghats :

Western Ghats	Eastern Ghats
1. Western Ghats is to the west of Deccan Plateau.	1. Eastern Ghats is to the east of Deccan Plateau.
2. Western Ghats is comparatively narrower and its altitude is comparatively high.	2. Eastern Ghats is comparatively wider and its altitude is comparatively low.

(4) Lakshadweep Islands Group and Andaman-Nicobar Islands Group :

Lakshadweep Islands Group	Andaman-Nicobar Islands Group
1. Lakshadweep Islands Group is located in the Arabian Sea.	1. Andaman-Nicobar Islands group is located in the Bay of Bengal.
2. Islands in Lakshadweep Islands Group are comparatively small in extent and are short in height.	2. Islands in Andaman-Nicobar Islands Group are comparatively large in extent and have hilly regions.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

(5) Forest Types of India and Forest Types of Brazil :

Forest Types of India	Forest Types of Brazil
1. The location of India is far away from equator. Therefore, the tropical evergreen forests are not seen in India.	1. The northern region near equator in Brazil receives abundant sunshine and heavy rainfall. Therefore, the tropical evergreen forests are seen in northern part of Brazil.
2. Himalayan forests are found in northern part and snow covered mountainous regions in India.	2. No snow covered mountainous regions are found in Brazil. Therefore, the Himalayan forests that are seen in India are not seen in Brazil.

CHAPTER 6 : POPULATION

(6) Sex Ratio of India and Sex Ratio of Brazil :

Sex Ratio of India	Sex Ratio of Brazil
1. Sex ratio of India is unfavourable for females.	1. Sex ratio of Brazil is favourable for females.
2. In 2011, the sex ratio in India was 947 only.	2. In 2011, the sex ratio in Brazil was 1090.

CHAPTER 7 : HUMAN SETTLEMENTS

(7) Urbanisation in India and Urbanisation in Brazil :

(July '19)

Urbanisation in India	Urbanisation in Brazil
1. The rate of urbanisation is comparatively lower in India.	1. The rate of urbanisation is comparatively higher in Brazil.
2. In 2011, the rate of urbanisation was only 31.2 per cent.	2. In 2011, the rate of urbanisation was only 84.6 per cent.

(8) Human Settlements in Ganga River Basin and Human Settlements in Amazon River Basin :

Human Settlements in Ganga River Basin	Human Settlements in Amazon River Basin
1. Nucleated and dense human settlements are found in Ganga river basin.	1. Scattered and dispersed human settlements are found in Amazon river basin.
2. Mild climate, fertile soil, dense network of transport routes, etc. favourable factors have encouraged human settlements in Ganga river basin.	2. Unhealthy climate, rigid topography, dense forests, etc. unfavourable factors have discouraged human settlements in Amazon river basin.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

(9) Water Transport in Amazon River and Water Transport in Ganga River :

Water Transport in Amazon River	Water Transport in Ganga River
1. International commercial water transport is carried out in the Amazon river.	1. Internal water transport is carried out in the Ganga river.
2. The amount of water transport carried out in Amazon river is comparatively higher.	2. The amount of water transport carried out in Ganga river is comparatively low.

(10) Communication in Brazil and Communication in India :

Communication in Brazil	Communication in India
1. The communication system in Brazil is comparatively modern and effective.	1. The communication system in India is comparatively less modern and less effective.
2. In Brazil, nearly more than 45 per cent of total population has access to the internet.	2. Though India is one of the largest users of internet in the world, only 30 per cent of the total population has access to the internet.

Q. Write short notes : (2 out of 3 questions; 2 marks each)

Remember : (1) Three questions will be given in question paper. (2) Students are expected to write answers to any two questions. (3) Two to four points are expected in answer.

CHAPTER 1 : FIELD VISIT

(1) Items to be carried for a field visit. (March '23)

Ans. For the answer, refer to 4(A) from Question Set 20.

(2) Precautions to be taken continuously during field visit.

Ans. We will take the following precautions continuously during field visit :

(1) We will ensure safety of oneself and others and will carry identity card, first aid box, etc. with oneself for emergency circumstances.

(2) We will strictly obey the instructions given by teachers.

(3) During field visit, we will try to gather information about local circumstances by conversing with the local people.

(4) We will also ensure that one does not harm the environment in any way during field visit.

CHAPTER 2 : LOCATION AND EXTENT

(3) The latitudinal and longitudinal extent of India and Brazil.

Ans. (A) India : (1) **Latitudinal extent :** The latitudinal extent of the mainland of India is from 8°4' N latitude to 37°6' N latitude. Indira Point is the southernmost point of India's territory. It is located on Nicobar island at the 6°45' latitude.

(2) **Longitudinal extent :** The longitudinal extent of India is from 68°7' E to 97°25' E.

(B) Brazil : (1) Latitudinal extent :

The latitudinal extent of Brazil is from 5°15' N to 33°45' S.

(2) **Longitudinal extent** : The longitudinal extent of Brazil is from 34°45' W to 73°48' W.

(4) Location and extent of Brazil.

Ans. (1) Brazil is located in the northern part of the continent of South America. It is located in the Northern, Southern and Western Hemispheres.

(2) The latitudinal extent of Brazil is 5°15' N to 33°45' S.

(3) The longitudinal extent of Brazil is 34°45' W to 73°48' W.

(4) The Equator passes through the northern part of Brazil. The Tropic of Capricorn passes through the southern part of Brazil.

(5) The historical background and the current status of Brazil.

OR

Historical background of Brazil.

(July '22; March '24)

Ans. (1) Brazil was under the rule of Portuguese for more than three centuries. It got independence on 7th September, 1822.

(2) From 1930 to 1985, Brazil had a military government. From 1985, it has federal presidential republic type of government.

(3) In the late 20th century, Brazil had faced many financial difficulties and had overcome them successfully.

(4) Today, Brazil is seen as one of the important countries contributing to economic growth of the world and a major global market in future.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

(6) Western coastal plain.

(July '22)

Ans. (1) The western coastal region of India borders the Arabian Sea.

(2) At places, spurs taking off from the Western Ghats have extended right up to the western coast. As its effect, the western coast is rocky in nature.

(3) The width of the western coast is comparatively less.

(4) Westward flowing rivers meeting the Arabian Sea form estuaries and not deltas on the western coast.

(7) The coasts of Brazil.

(March '23)

Ans. (1) The coastline of Brazil extends for approximately 7400 km. It is divided into the northern coast and the eastern coast.

(2) The coast extending from Amapa province in the north to Rio Grande do Norte is known as the northern coast/North Atlantic coast. The coast extending from Rio Grande do Norte to the south is known as the eastern coast/South Atlantic coast.

(3) Northern coast is a low-lying region as Amazon and its many tributaries flow to the northern coast and meet North Atlantic Ocean. Marajo island, Marajo and Sao Marcos Bays lie on this coast. Marajo coastal island lying on the northern coast is located between the mouths of River Amazon and River Tocantins.

(4) Many small rivers flow to the eastern coast and meet South Atlantic Ocean. Sao Francisco is the only major river meeting the South Atlantic Ocean in this region. Many beaches and sand dune complexes lie on the eastern coast of Brazil. In some areas, the eastern coast of Brazil is protected by coral reefs and atoll islands.

(8) Islands of Brazil.

Ans. (1) Besides mainland, some islands are also included in Brazil. These islands are divided into the coastal islands and the marine islands.

(2) Most of the coastal islands of Brazil are formed due to depositional work of Amazon river and its tributaries. The islands near the eastern coast of Brazil that are in South Atlantic Ocean are coral islands. These islands are called atolls.

(3) Most of Marine islands were a part of the mainland of Brazil. These islands are located in the Atlantic Ocean and nearly 300 km away from the mainland of Brazil.

(4) Most of marine islands of Brazil are rocky. These islands are the tops of the submerged mountains.

(9) The characteristics of the Western Ghats.

Ans. The characteristics of the Western Ghats are as follows :

(1) The Western Ghats is a mountain range that runs north to south parallel to the Western Coast of the Indian peninsula.

(2) It demarcates the western side of Deccan plateau. Many peninsular rivers like Godavari, Krishna, Kaveri have their source in Western Ghats.

(3) The Western Ghats is not a single mountain like a wall. It includes series of ranges. At some places, it has regions of very low altitude too.

(4) The Western Ghats separate the westward flowing rivers meeting to Arabian Sea from the eastward flowing rivers meeting the Bay of Bengal.

(10) Amazon river basin.

Ans. (1) Amazon river basin is the largest plain land of Brazil. It lies in the northern part of Brazil. The slope of Amazon river basin is to the east.

(2) The width of Amazon river basin is the maximum, i.e. nearly 1300 km in the west. Its width is the minimum, i.e. 240 km where the Guiana Highlands and Brazilian Highlands come closer.

(3) As the Amazon river approaches the Atlantic Ocean, the width of Amazon river basin/plains increases.

(4) Amazon river basin/plains is covered by the evergreen tropical rainforests. Most of the area of Amazon river basin is inaccessible due to dense undergrowth and frequent flooding.

(11) The Indian peninsula.

Ans. (1) The Indian peninsula lies to the south of North Indian Plains. This region tapers towards the Indian Ocean.

(2) Many plateaus and hill ranges are included in the Indian peninsula. The Aravalis range is located in the north of the Indian peninsula. It is the oldest mountain range in the Indian peninsula.

(3) The Indian peninsula also includes a series of plateaus bordering the Plains. Maharashtra Plateau, Karnataka-Telangana Plateau, Chhota Nagpur Plateau, etc. are the main plateaus in this region.

(4) Vindhya and Satpuda ranges are located in the central part of the Indian peninsula. It also includes mountainous/hilly regions of the Western Ghats in the west and the Eastern Ghats in the east.

(12) Guyana Highlands.

Ans. (1) The main region of the Guyana Highlands is in Venezuela. Guyana Highlands extends from the west to French Guiana in the east.

(2) Guyana Highlands is in the northern part of Brazil. It is spread in the states of Roraima, Para and Amapa.

(3) The region of comparatively low height of Guyana Highlands is found in Brazil. The highest peak of Brazil, Pico de Neblina lies on the border between Brazil and Venezuela. The height of this peak is nearly 3014 m.

(4) Guyana Highlands and Brazilian Highlands together form the core of the continent of South America.

CHAPTER 4 : CLIMATE

(13) Retreating monsoon.

(March '24)

Ans. (1) The southwest monsoon winds flowing from the mainland of India are obstructed by the Himalayan ranges in the north resulting their return journey backward towards the Indian Ocean.

(2) These winds blowing from northeast to southwest direction again brings monsoon to Indian Peninsula. This monsoon is called as retreating monsoon.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

(14) The evergreen forests in India.

Ans. (1) The evergreen forests in India are found in the regions receiving abundant sunlight and annual average rainfall more than 2000 mm. These forests are found in the Andaman and Nicobar Islands, the Western Ghats, the coastline of peninsular India and the Assam region in the north-east.

(2) The trees like mahogany, rosewood, rubber, sandalwood, etc. are found in the evergreen forests in India. Various types of creepers are also found in these forests.

(3) The trees from evergreen forests have broad and green leaves. Their wood is found to be hard, heavy and durable.

(4) Many species of vegetation and wildlife is found in evergreen forests in India.

(15) Wildlife in India.

Ans. (1) India is gifted with rich and diversified wildlife. India is the only country in the world that has tigers as well as lions.

(2) Elephants are found in the hot and humid forests in the

southern part of India. Assam is famous for one-horned rhinoceroses. They are found in swampy and marshy lands of Assam. Wild ass and camels are commonly found in arid desert lands in India. Snow leopards and yaks are found in the snow capped northern regions of Himalayan range.

(3) Indian bison, deer, antelopes, monkeys are the animals seen in peninsular region of India. Turtles, crocodiles and gharials are seen in the rivers, estuaries and western and eastern coastal regions of India.

(4) Peacocks, Indian bustard, kingfishers, peafowls, ducks, parakeets, cranes, pigeons, etc. are the major birds seen in various parts of India.

(16) Himalayan forests in India.

Ans. (1) The forests in Himalayan range are known as Himalayan forests. Himalayan forests are classified into three types on the basis of altitude.

(2) The areas at higher altitude in Himalayan range are often covered with snow. In summer, the snow from this region starts melting leading to growth of seasonal flowering trees.

(3) The areas at medium altitude in the Himalayan range are covered with the forests having the coniferous trees like pine, deodar, fir, etc. These trees have needle-shaped leaves. These leaves allow for snow to easily glide off the branches.

(4) The areas at low altitude in the Himalayan range, i.e. at the foothills of Himalayan range, mixed forests are found. Coniferous as well as deciduous types of forests are found in this region. Sal trees are seen in greater quantities in most of these forests.

(17) Deciduous forests of India.

(March '24)

Ans. (1) Deciduous forests are found in India in the areas receiving rainfall between 1000 mm and 2000 mm.

(2) Deciduous type of vegetation is characterised by trees that shed their leaves during dry/summer season.

(3) Trees like Teak, Bamboo, Banyan, Peepal, etc. are found in deciduous forests in India.

(4) Most of the forest area of India is covered by deciduous forests.

CHAPTER 6 : POPULATION

(18) Census in India.

Ans. (1) In India, Census is conducted by the institute of Census of India once every ten years.

(2) In India, the first Census survey was carried out in 1872.

(3) In India, Census is conducted at the start of the decade. (i.e. 2001, 2011)

(4) In India, the next Census survey will be carried out in 2031.

(19) Census in Brazil.

Ans. (1) In Brazil, Census is conducted by the institute of Brazilian Institute of Geography and Statistics once every ten years.

(2) In Brazil, the first Census survey was carried out in 1872.

(3) In Brazil, Census is conducted at the end of the decade. (i.e. 2000, 2010)

(4) In Brazil, the next Census survey will be carried out in 2030.

CHAPTER 7 : HUMAN SETTLEMENTS

(20) Importance of “Go West” policy in Brazil.

Ans. (1) In Brazil, rapid urbanisation has taken place in the south and southeastern parts especially in the state of Sao Paulo and many other major metropolitan industrial areas.

(2) The rate of urbanisation is found to be low in western and northern parts of Brazil.

(3) To avoid concentration of human settlements only in specific regions, the government of Brazil has promoted the “Go West” policy.

(4) This policy will help in reducing the pressure of population on few (southeastern) areas. This policy will also help in reducing regional imbalance in the country.

CHAPTER 8 : ECONOMY AND OCCUPATIONS

(21) Mining in India.

(March '23)

Ans. (1) Chhota Nagpur Plateau in India is known as a big storehouse of variety of minerals. Therefore metallurgical industries are developed on large scale in the northeastern peninsula.

(2) Coal is mined in Korba in Chhattisgarh and in eastern Maharashtra in India.

(3) Marble stones are found in Rajasthan and cuddapah stones are found in Andhra Pradesh in India.

(4) In India, mineral oil wells are found in Digboi in Assam, Mumbai High in Arabian Sea near Mumbai in Maharashtra, Kalol and Koyali in Gujarat Reserves of mineral oil and natural gas have been found at the mouth of river Godavari.

(22) Agro-based industries in India.

Ans. (1) Agro-based industries are well developed at various places in India. In India, cotton, jute and sugar industries are mainly located in the raw-material producing areas.

(2) In India, sugar industries are mainly developed in the states like Maharashtra, Uttar Pradesh, etc. Similarly, jute industries are developed in the state of West Bengal.

(3) In India, the forest-based industries like paper, plywood, matches, resins and lac are developed in many states near the forest areas.

(4) In India, the coir, copra and fish canning industries are mainly located in the western coastal region especially in the state of Kerala.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

(23) Development of communication in Brazil. (July '22)

Ans. (1) The landline phone services, mobile phone services, television and radio broadcasting, computer and internet facilities, etc. telecommunication services are well developed in Brazil.

(2) Today, nearly more than 45 per cent of Brazilian population has access to the internet facility.

(3) The central and the southern part of Brazil is densely populated. The modern telecommunication infrastructure is fairly developed in this region.

(4) The northern and western part of Brazil is sparsely populated. The communication infrastructure is comparatively limited in these regions.

(24) The main features of tourism in India.

Ans. (1) Tourism is one of the important occupations in India. Cultural and historical heritages, sculptures, clean seacoasts, national parks, bird sanctuaries, etc. have boosted the growth of tourism in India.

(2) Many foreign tourists visit India for exploring Indian heritage and culture, to carry out adventurous or business activities and to receive health services, etc.

(3) Since 2010, the number of international (foreign) tourists in India is remarkably constantly growing.

(4) There are plenty of opportunities for tourism at many places in India. Nowadays, ecotourism is promoted on a large scale in India.

(25) Importance of Standard time.

Ans. (1) If the country has a vast longitudinal extent, there will be a great difference between the time of its places located in the eastern and the western parts. In such countries, the importance of Standard time is the most.

(2) The Standard time of a country is its official time. It is commonly accepted at all places in a country.

(3) Standard time helps in making schedule of railways or airways.

(4) It also helps in coordinating the functioning of banks, schools, colleges, markets, hospitals located in various parts of a country.

Question Set 15

MAP FILLING [Q. 4 (A) : Total Marks 4]

Q. Fill the map and make an index/prepare a map with the help of given information : (4 out of 6 details; 1 mark each)

Remember : (1) Outline map of India/Brazil will be provided. (2) Six details will be given in question paper. (3) Fill/show four of them on a provided outline map. (4) Give index to score full marks.

CHAPTER 2 : LOCATION AND EXTENT

(1) Mark the following in the outline map of Brazil. Write the names and give index :

(1) Areawise smallest state in Brazil (**July '19**) (2) Capital of Brazil (**July '19; Sept. '21; March '24 – '25**) (3) Amazonas state (4) Parana state (5) Amapa state (**Sept. '21**) (6) Equator (**March '24**) (7) Maranhao state (**March '25**).

Ans.

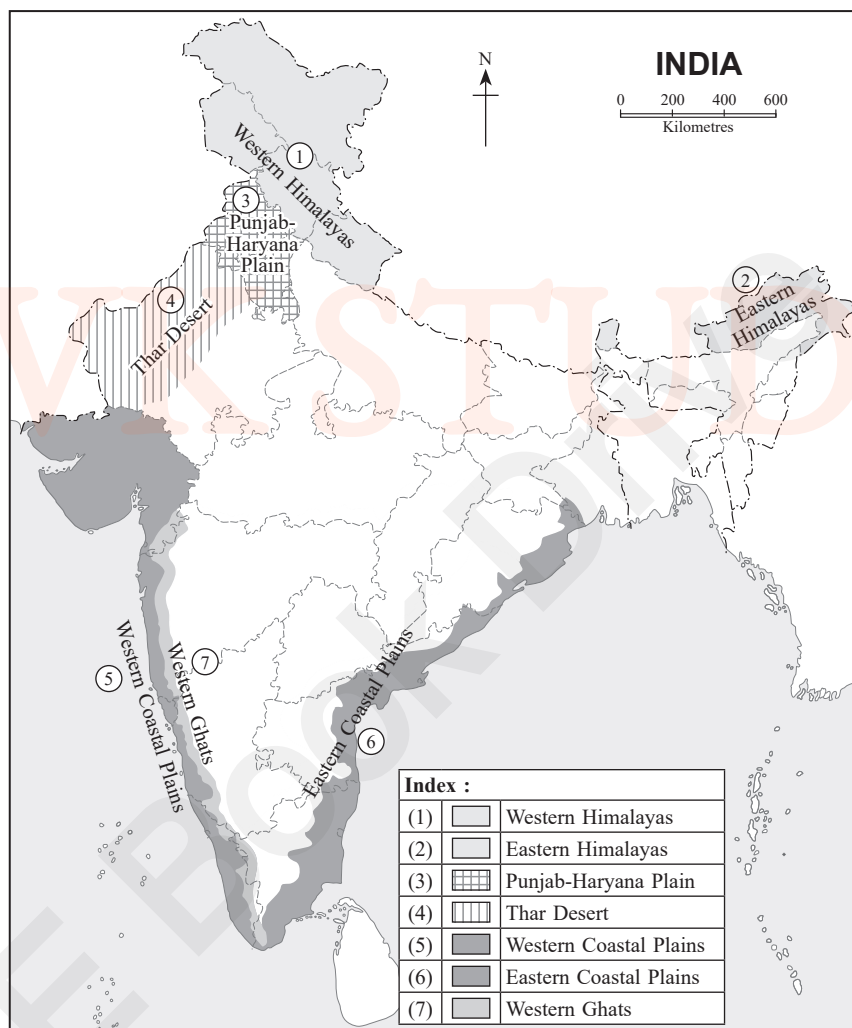

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

(2) Mark the following on a given outline map of India. Give index :

(1) Western Himalayas (2) Eastern Himalayas (3) Punjab-Haryana Plain (4) Thar Desert (5) Western Coastal Plains (6) Eastern Coastal Plains (7) Western Ghats.

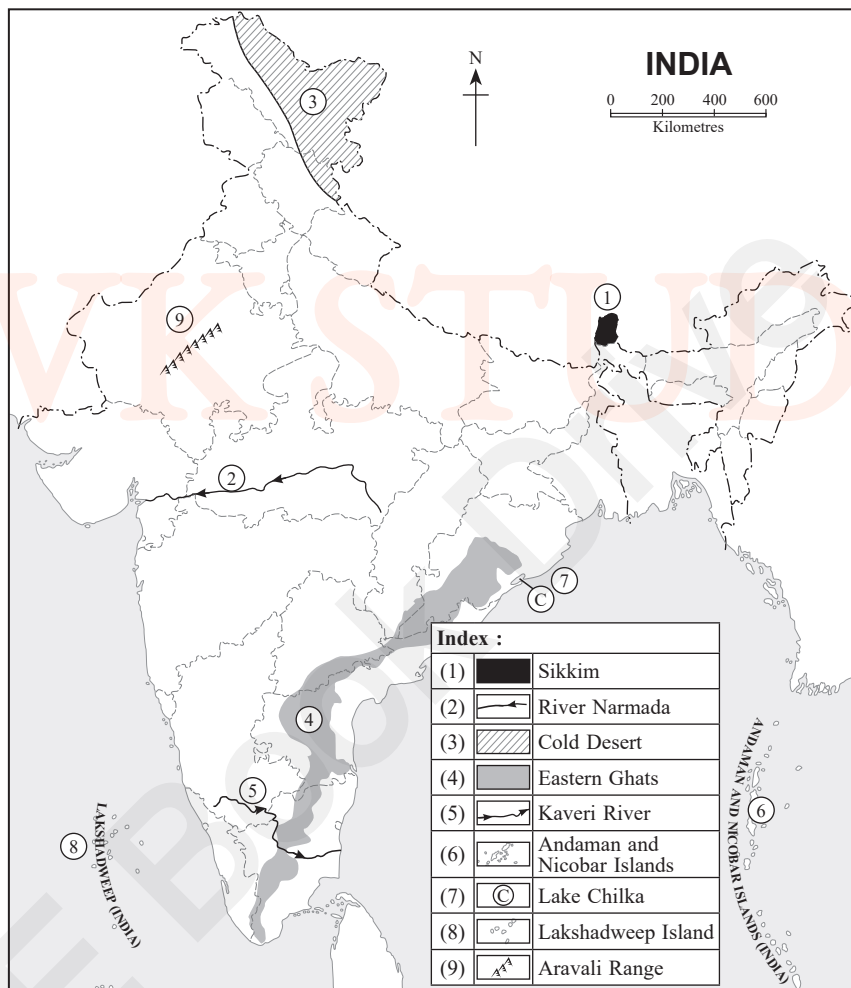

Ans.

(3) Mark the following on a given outline map of India. Give index :

(1) Sikkim (**March '22**) (2) River Narmada (3) Cold Desert (**March '23; July '23**) (4) Eastern Ghats (5) Kaveri River (**July '22**) (6) Andaman and Nicobar Island (**July '22**) (7) Lake Chilka (**July '22; March '23**) (8) Lakshadweep Island (**March '22; July '23**) (9) Aravali Range.

Ans.

(4) Mark the following on a given outline map of Brazil. Give index :

(1) Marajo Islands (**March '19–'24–'25**) (2) Pico-de-Neblina (**March '19– '25; Sept. '21**)/Highest peak in Brazil (**July '19; March '24**) (3) Pantanal Wetland (**March '19; Nov. '20**) (4) Drought Quadrilateral (**March '19; July '19; Sept. '21**) (5) Caatinga (**March '19**) (6) Casino Beach (7) Parana River (**Sept. '21; March '25**) (8) Sao Francisco River (**March '24**).

Ans.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

(5) Mark the following on the given outline map of Brazil. Give index :

- (1) Golden Lion – Tamarin (**March '19**) (2) Anaconda (3) Condor
(4) Pink Dolphins (5) Region where Anacondas are found in Brazil. (**July '19**) (6) Pampas Grasslands (**July '19; Nov. '20**)/Pampas (**March '24 – '25**) (7) Region of thorny shrubs (**Nov. '20**).

Ans.

CHAPTER 6 : POPULATION

(6) Mark the following on a given outline map of India. Give index :

(A) States and Union territories with least density of population :

- (1) Jammu and Kashmir (**July '22**) (2) Ladakh (**July '22**)

(3) Arunachal Pradesh (4) Nagaland.

(B) States with moderate density of population :

(1) Maharashtra (2) Punjab (3) Karnataka.

(C) States with high density of population :

(1) West Bengal (2) Kerala (3) Bihar.

(D) State with highest sex ratio.

(July '22)

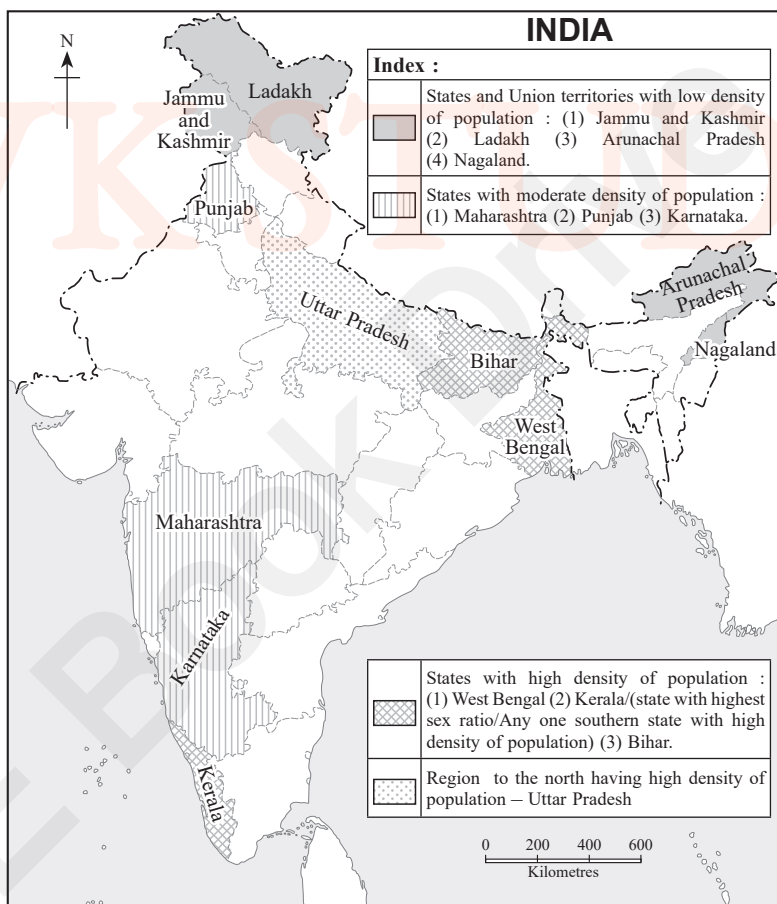

(E) Any one southern state with high density of population.

(March '22)

(F) Region to the north having high density of population.

(March '23)

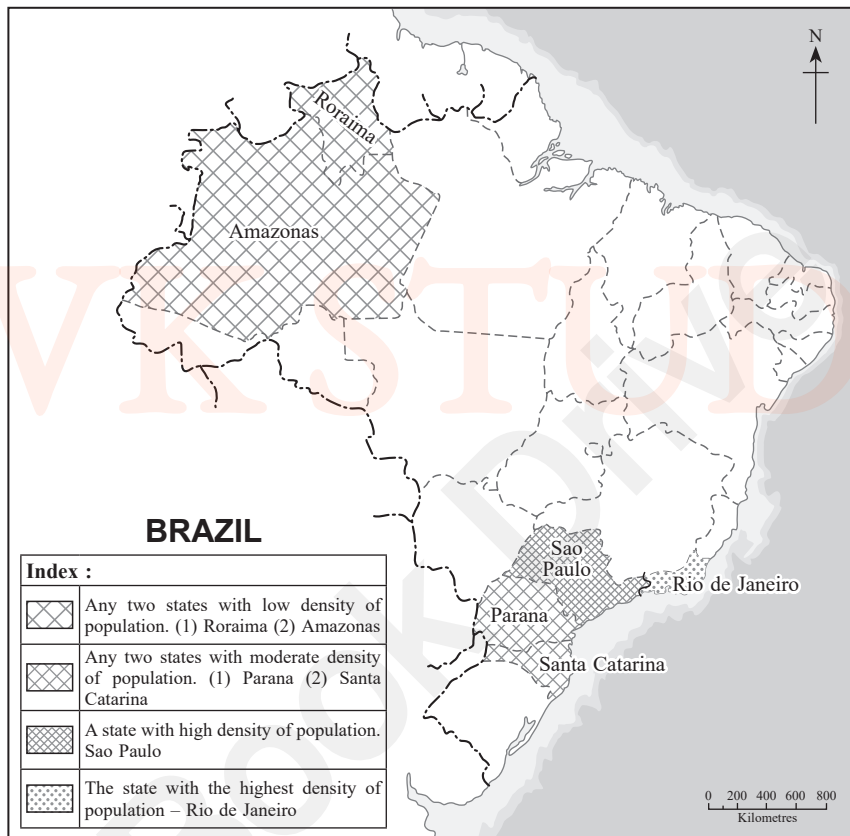

Ans.

(7) Mark the following on a given outline map of Brazil. Give index :

- (A) Any two states with low density of population.
- (B) Any two states with moderate density of population.
- (C) A state with high density of population.
- (D) The state with the highest density of population. (Sept. '21)

Ans.

CHAPTER 7 : HUMAN SETTLEMENTS

(8) Show the following on the given outline map of Brazil.

Give index :

(1) States with 51 to 60 per cent of urban population :

(1) Para (2) Maranhao.

(2) States with 61 to 70 per cent of urban population :

(1) Ceara (2) Bahia.

(3) States with 71 to 80 per cent of urban population :

(1) Acre (2) Rondonia.

(4) States with 81 to 90 per cent of urban population :

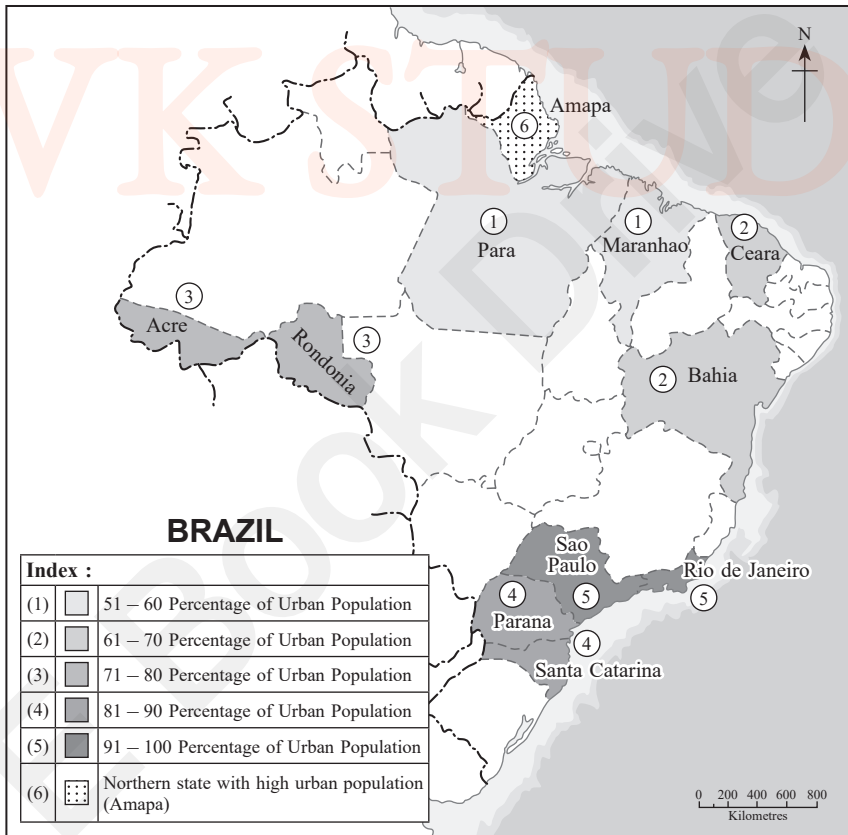

(1) Parana (2) Santa Catarina.

(5) States with 91 to 100 per cent of urban population :

(1) Sao Paulo (2) Rio de Janeiro.

(6) Northern State with high urban population (Amapa) (**Nov. '20**)

Ans.

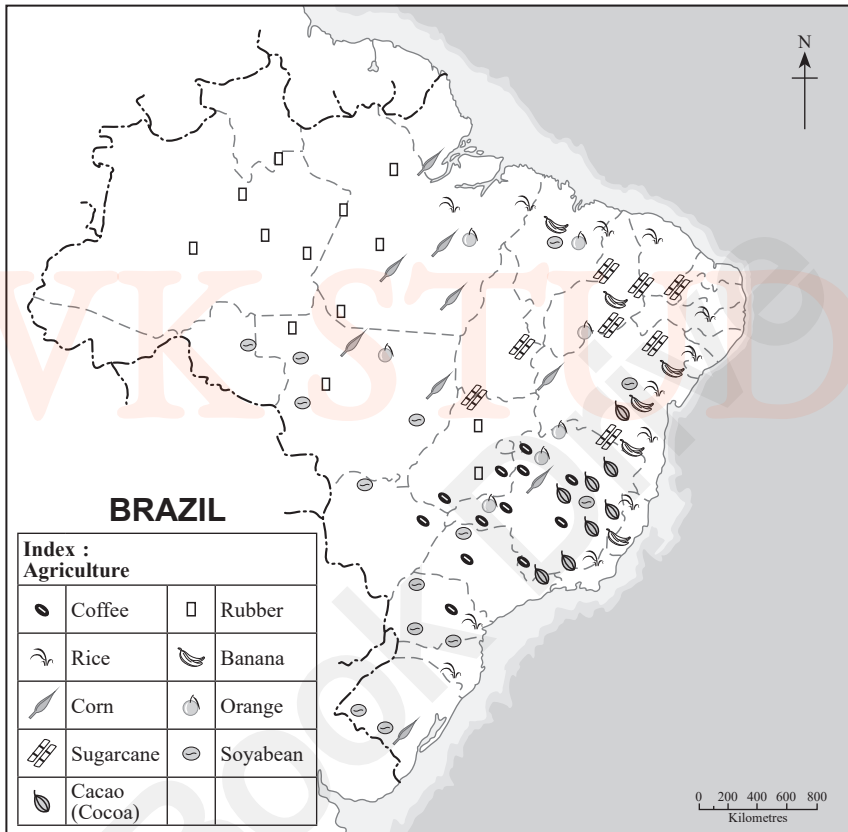

CHAPTER 8 : ECONOMY AND OCCUPATIONS

(9) Show the producing areas of the following crops in the outline map of Brazil with index :

- (1) Coffee/coffee producing region (**Nov. '20**) (2) Rice (3) Corn
(4) Sugarcane (5) Cacao (Cocoa) (6) Rubber (7) Banana (8) Orange
(9) Soyabean.

Ans.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

(10) Show the following on a given outline map of India. Give index :

- (A) **Ports** : (1) Chennai (**March '22**) (2) Porbandar (3) Kandla
(4) Kolkata (5) Kochi (**July '23**).

(B) Airports : (1) Bengaluru (2) Delhi (3) Pune (4) Thiruvananthapuram.

(C) Railway Junctions : (1) Mumbai (2) Itarsi (3) Kota (4) Nagpur.

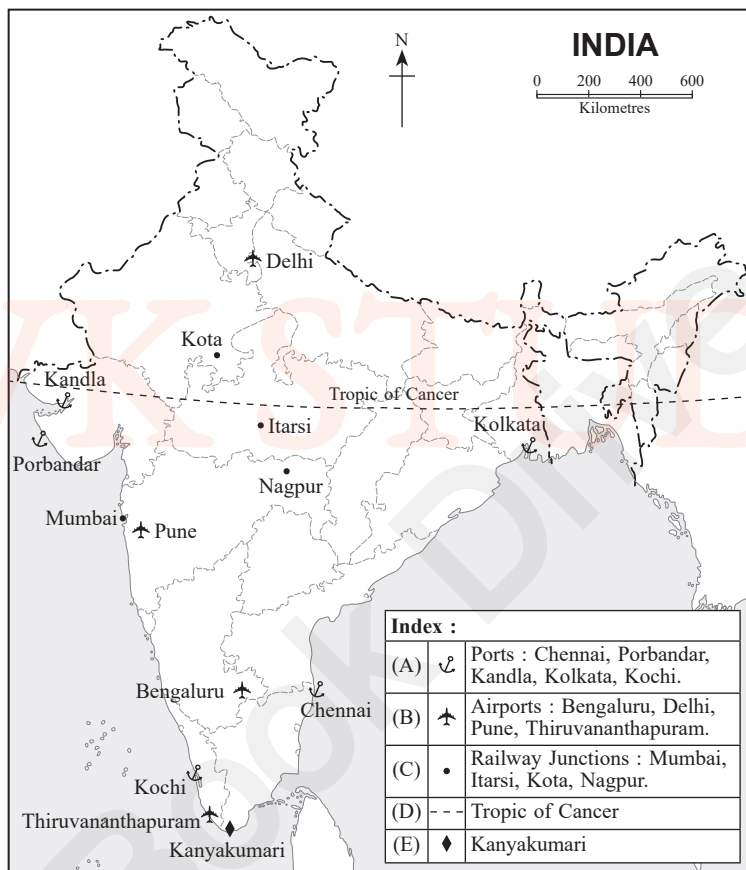

(D) Tropic of Cancer.

(March '22; July '22 – '23)

(E) Kanyakumari.

(March '23)

Ans.

(11) Show the following on a given outline map of Brazil.
Give index :

(A) Ports : (1) Vitoria (2) Manaus.

(Nov. '20)

(B) Airports : (1) Brasilia (2) Campo Grande.

(C) Railway Junctions : (1) Sao Paulo (2) Rio de Janeiro.

Ans.

Question Set 16

MAP READING

[Q. 4 (B) : Total Marks 4]

Q. Answer the following questions on the basis of the given map :
(4 out of 5 questions; 1 mark each)

Remember : (1) A map with five map based questions will be given in the question paper. (2) Answer any four of them. (3) Observe the details shown on a map carefully to answer accurately.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

Q. 1. Observe/Study the following map and answer the following questions :

(1) In which direction do the Aravalis lie?

Ans. The Aravalis lie in southwest-northeast direction.

(2) Aravali ranges act as a water divide between which rivers?

Ans. Aravali ranges act as a water divide between many tributaries of Ganga river, main river Ganga and Luni, Mahi rivers.

(3) Name the hills located on the plateau to the east of Aravalis.

Ans. The hills located on the plateau to the east of Aravalis :

(1) Vindhya Range (2) Satpuda Range.

(4) Across which states has the Deccan Plateau spread?

Ans. The Deccan Plateau spread across the states of Maharashtra, Karnataka and Telangana.

(5) Why are the Western Ghats called a water divide?

Ans. The Western Ghats are called a water divide because they act as a divide between the west flowing rivers meeting the Arabian Sea and east flowing rivers meeting the Bay of Bengal.

(Note : For clear understanding of map/figure/graph reading type question, here a map is given for Q. (1). However, for some further question and for some map/figure/graph reading questions in further chapter, the references of maps/figure/graph from textbook are given and only answers are given in this book.)

Q. 2. Study the Figure 3.2 given on page 15 of the textbook and answer the following questions :

(1) What is the range of altitude of Amazon river basin?

Ans. The range of altitude of Amazon river basin is between 0 metre and 200 metres.

(2) Between which two highlands is the Amazon river basin located?

Ans. The Amazon river basin is located between the Guyana highlands and the Brazilian highlands.

(3) Observe the region with the altitude 500 to 1000 metres. Describe the locational extent of this region shown in yellow with reference to direction.

Ans. The region with the altitude 500 to 1000 metres shown in yellow extends from northeast to southeast direction.

(4) Besides the Amazon river basin, where else do you find regions with an altitude of less than 200 metres?

Ans. Besides the Amazon river basin, we find regions with an altitude of less than 200 metres at Paraguay river basin and southern region of Pampas.

(5) Describe the plateau region with height of 200 to 500 metres through which tributaries of Amazon flow in your own words.

Ans. The plateau region with height of 200 to 500 metres through which the tributaries of Amazon flow is located between Amazon river basin and Brazilian highlands. Xingu river and other tributaries of Amazon river flow from this region.

Q. 3. Observe the Figure 3.4 given on page 20 of the textbook and answer the following questions : (March '23)

(1) Which is the major river in Brazil?

Ans. Amazon is the major river in Brazil.

(2) Name the important island in Brazil.

Ans. The name of the important island in Brazil is Marajo.

(3) Towards which direction does Uruguay river flow?

Ans. Uruguay river flows from east to west direction.

(4) Sao Francisco river terminates into which ocean?

Ans. Sao Francisco river terminates into South Atlantic Ocean.

(5) Name any one river meeting the North Atlantic Ocean.

Ans. Name of rivers meeting the North Atlantic Ocean are Amazon, Paraniba, Itapekeru, etc.

CHAPTER 4 : CLIMATE

Q. 4. Study the Figure 4.1 and 4.2 given on page 25 of the textbook and answer the following questions :

(1) Considering the isotherms of Brazil, what is the average range of temperature in Brazil?

Ans. The average range of temperature in Brazil is 18°C to 28°C.

(2) In which area does it rain more in Brazil?

Ans. It rains more in Amazon river basin in Brazil.

(3) From which directions are winds flowing towards Brazil?

Ans. Winds flow towards Brazil from southeast and northeast directions.

(4) In which part of Brazil are the average temperatures low?

Ans. The average temperatures are low in Paraguay-Parana river basin.

(5) Which method has been used to show distribution in the map?

Ans. The isopleth method is used to show the distribution of the annual average temperature and the choropleth method is used to show the distribution of the annual average rainfall.

Q. 5. Study the Figure 4.3 given on page 26 of the textbook and answer the following questions :

(1) Which region gets more than 4000 mm of rainfall?

Ans. The southern part of western coastal region and the northeastern region get more than 4000 mm of rainfall.

(2) Identify the regions with maximum and minimum temperatures.

Ans. Thar desert in Rajasthan and the peninsular regions in the south are the regions of the maximum temperature and the Himalayan regions in the north are the regions of the minimum temperatures.

(3) Identify the directions of the winds shown. What are they known as?

Ans. The direction of winds shown is from southwest to the northeast. These winds are known as southwest monsoon winds.

(4) Which winds are responsible for the rainfall in India?

Ans. Southwest monsoon winds are responsible for the rainfall in India.

(5) Which parallel of latitude passes through India affecting its climate?

Ans. The Tropic of Cancer passes through India affecting its climate.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

Q. 6. Study the Figure 5.3 given on page 33 of the textbook and answer the following questions :

(1) Which forests are found in western coastal regions?

Ans. Evergreen forests are found in western coastal regions.

(2) On which coast do you mainly find the coastal vegetation?

Ans. The coastal vegetation is mainly found on the eastern coast.

(3) In which state is the cold desert region located?

Ans. The cold desert region is located in the state of Jammu and Kashmir.

(4) In which state is the hot desert region located?

Ans. The hot desert region is located in the state of Rajasthan.

(5) Which forests are found in the state of Kerala?

Ans. Evergreen forests are found in the state of Kerala.

Q. 7. Study the Figure 5.4 given on page 34 of the textbook and answer the following questions : (March '22)

(1) Name any two forests in Brazil.

Ans. The names of two forests in Brazil are Equatorial forests and Hot Deciduous forests.

(2) Name the Island shown in the map.

Ans. The name of the island shown in the map is Marajo Island.

(3) In which place do you find crocodiles?

Ans. Crocodiles are found in Pantanal region.

(4) Where are Tamarin found in Brazil?

Ans. Tamarin are found in Amazon river basin in Brazil.

(5) Name the grassland to the southernmost part of Brazil.

Ans. The name of the grassland to the southernmost part of Brazil is Pampas.

Q. 8. Study the Figure 5.4 given on page 34 of the textbook and answer the following questions :

(1) In which part are condors found in Brazil?

Ans. Condors are found in the northern part of Brazil.

(2) In which region are Anaconda found?

Ans. Anaconda are found in Pantanal region.

(3) In which region are Golden lion tamarin found?

Ans. Golden lion tamarin are found in Amazon river basin.

(4) In which part are Grasslands seen in Brazil?

Ans. Grasslands are seen in the southern part of Brazil.

(5) In which part are the tropical forests seen in Brazil?

Ans. Tropical forests are seen in the eastern part of Brazil.

CHAPTER 6 : POPULATION

Q. 9. Study the map in Figure 6.1 (b) given on page 38 of the textbook and answer the following questions :

(1) Name the states with highest population density.

Ans. The states with highest population density : (1) Uttar Pradesh (2) Bihar (3) West Bengal (4) Kerala (5) Andhra Pradesh, etc.

(2) Name the states with lowest population density.

Ans. The states with lowest population density : (1) Jammu and Kashmir (2) Himachal Pradesh (3) Uttarakhand (4) Arunachal Pradesh (5) Nagaland (6) Rajasthan (7) Madhya Pradesh (8) Chhattisgarh, etc.

(3) How much is the density of population in the state of Maharashtra?

Ans. The density of population in the state of Maharashtra is 251 to 500 persons per sq. km.

(4) How much is the density of population in the state of West Bengal?

Ans. The density of population in the state of West Bengal is more than 501 persons per sq. km.

(5) How much is the density of population in the state of Manipur?

Ans. The density of population in the state of Manipur is 101 to 250 persons per sq. km.

Q. 10. Study the map in Figure 6.2 (b) given on page 39 of the textbook and answer the following questions : (July '23)

(1) Name the state in Brazil with highest density of population.

Ans. The state in Brazil with highest density of population is Rio de Janeiro/Sao Paulo.

(2) What is the density of population in Roraima state?

Ans. The density of population in Roraima state is less than 50 per sq. km.

(3) Write the name of any one state having population density less than 50 on the eastern coast of Brazil.

Ans. The name of the state having population density less than 50 on the eastern coast of Brazil is Bahia/Rio Grande Do Sul.

(4) How much is the density of population in Ceara state?

Ans. The density of population in Ceara state is 51 to 100 per sq. km.

(5) What is the density of population in Brasilia?

Ans. The density of population in Brasilia is more than 300 per sq. km.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

Q. 11. Look at the map in Figure 9.9 given on page 63 of the textbook and answer the following questions :

(1) Which means of transport are seen on the map?

Ans. Waterways, roadways, railways and airways are seen on the map.

(2) Which highway can be seen prominently?

Ans. Trans-Amazonian highway can be seen prominently.

(3) What could be the reason of development of railways in the southeast?

Ans. The plain topography, concentration of population and industries could be the reasons of development of railways in the southeast.

(4) In which part of Brazil do you see a lesser development of transport network? What could be the reason?

Ans. A lesser development of transport network is seen in the northern part of Brazil. Inaccessibility of the Amazon river basin due to rigid topography and the dense evergreen forests could be the reasons for it.

(5) On which river is Manaus port located?

Ans. Manaus port is located on Amazon river.

Q. 12. Observe the map in Figure 9.10 given on page 64 of the textbook and answer the following questions : (July '19)

(1) Which means of transport are seen on the map?

Ans. Roadways and Main ports are seen on the map.

(2) In which part of India is the density of roadways more?

Ans. In Southern Part of India especially in Tamil Nadu, the density of roadways is more.

(3) Name any two ports on the eastern coast.

Ans. Names of ports on the eastern coast :

Chennai, Vishakhapatnam, Kolkata, etc.

(4) Which highway connects Srinagar and Kanyakumari?

Ans. North-South Highway connects Srinagar and Kanyakumari.

(5) Which parts of India have a sparse network of transport?

Ans. Western ghats, North East and Mountainous regions towards North of India have a sparse network of transport.

Q. 13. Observe the map in Figure 9.10 given on page 64 of the textbook and answer the following questions : (Nov. '20)

(1) What does the map show?

Ans. The map shows India's national highways and major ports.

(2) Name the two places which connect North-South Highway.

Ans. Two places which connect North-South Highway are Srinagar and Kanyakumari.

(3) Name any two ports from Eastern coast.

Ans. The ports from Eastern coast : (1) Kolkata (2) Chennai.

(4) Which is the southernmost port located at western coastline of India?

(Nov. '20)

Ans. Kochi is the southernmost port located at western coastline of India.

(5) Name the important port of Maharashtra. (Nov. '20)

Ans. Important port of Maharashtra : Mumbai.

Q. 14. Look at the transport maps in Figure 9.10 given on page 64 of the textbook and answer the following questions :

(March '24)

(1) What is the title and subtitle of the map?

Ans. The title of the map is INDIA and the subtitle of the map is National Highways and major ports.

(2) Which part has more density of roadways?

Ans. North Indian Plains has more density of roadways.

(3) Name two ports to the western coast.

Ans. Two ports to the western coast are (1) Mumbai (2) Kochi
(3) Kandla (4) Porbandar.

(4) Name the highway that connects Porbandar and Silchar.

Ans. The highway that connects Porbandar and Silchar is East-West Highway.

(5) Name the island near Kolkata.

Ans. The island near Kolkata is New Moore Island.

Q. 15. Observe the map in Figure 9.11 given on page 65 of the textbook and answer the questions given below :

(March '19)

(1) What does the map show?

Ans. The map shows important railway routes and airports in India.

(2) Name any two airports from eastern coast.

Ans. Two airports from eastern coast :

(1) Chennai (2) Vishakhapatnam

(3) In which states, railway routes do not exist?

Ans. Railway routes do not exist in Jammu and Kashmir, Himachal Pradesh and Uttarakhand.

(4) Name the southernmost railway station of India.

Ans. The southernmost railway station of India : Kanyakumari.

(5) Which is the important railway station on the route of Mumbai–Mangalore?

Ans. Vasco-da-Gama is the important railway station on the route of Mumbai–Mangalore.

Q. 16. Study the Figure 9.12 given on page 66 of the textbook and answer the following questions : **(July '22)**

(1) What does the above map indicate?

Ans. The above map indicates Brazil Standard Time.

(2) How many time zones are shown in the map?

Ans. Four time zones are shown in the map.

(3) Which part of Brazil is ahead of others?

Ans. The easternmost part of Brazil is ahead of others.

(4) What does the dark line in the map show?

Ans. The dark line in the map shows the GMT-03 time zone which is the official Brazilian Time, i.e. BRT.

(5) To which direction does Ponto De Seixas lie?

Ans. Ponto De Seixas lies to the eastern most direction.

Q. 17. Study the Figure 9.13 given on page 67 of the textbook and answer the following questions : **(March '25)**

(1) What does the given map show?

Ans. The given map shows India – Location and extent.

(2) Name the southernmost point of India.

Ans. The southernmost point of India is the Indira Point.

(3) What is the East-West distance of India?

Ans. The East-West distance of India is 3000 km.

(4) Which longitude in India is called the Indian Standard Time?

Ans. 82°30'E longitude in India is called as the Indian Standard Time.

(5) Name the Sea to the West of India.

Ans. Arabian Sea is the sea to the West of India.

Q. Give geographical reasons for the following :

(2 out of 4 questions; 3 marks each)

Remember : (1) Four statements will be given in the question paper. (2) Give geographical reasons for any two statements of them. (3) Three points are expected in every answer.

CHAPTER 2 : LOCATION AND EXTENT

(1) Why is India looked upon as a young country?

Ans. (1) In India, the percentage of working people (young people) in population is greater than non-working population.

(2) In India, the percentage of working people in population is nearly 51 per cent.

(3) In India, the percentage of non-working population (children and senior citizens) is lesser than working population. Therefore, India is looked upon as a young country.

(2) Brazil is seen as an important global market in future.

(Sept. '21)

Ans. (1) For more than three centuries Brazil was under Portuguese rule.

(2) It has overcome global financial difficulties in the late 20th century.

(3) Brazil is seen as a contributor to economic growth of the world. Therefore, Brazil is seen as an important global market in future.

(3) Why is Brazil called 'coffee pot' of the world?

Ans. (1) Brazil ranks first in the world in terms of production of coffee.

(2) It produces nearly 40 per cent of the total coffee production of the world.

(3) It is the largest exporter of coffee. Therefore, Brazil is called 'coffee pot' of the world.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

(4) (Most of the) Himalayan rivers are perennial in nature.

(Sept. '21; March '25)

Ans. (1) Most of the Himalayan rivers originate in the snow covered southern heights of the Himalayan range.

(2) These rivers are well fed by rains during the rainy season through the southwesterly monsoon winds.

(3) These rivers are also fed by the melting of snow during summer. Therefore, most of the Himalayan rivers are perennial in nature.

(5) There are fewer natural ports on the eastern coast of India.

(March '19; Nov. '20; July '22 - '23)

Ans. (1) The eastern coast of India is formed due to the depositional work of eastward flowing rivers meeting the Bay of Bengal.

(2) Most of the western coast of India is a coast of submergence. On the other hand eastern coast of India is a coast of emergence. As its effect, sea is deeper in the west than sea on the eastern coast.

(3) Westward flowing rivers meeting the Arabian Sea form estuaries at many places on the western coast. On the other hand, eastward flowing rivers meeting the Bay of Bengal form deltas at many places on the eastern coast. As its effect, it becomes difficult for ships to reach the east coast covered with sediments. Therefore, there are fewer natural ports on the eastern coast of India.

(6) There are no west-flowing rivers in Brazil.

Ans. (1) Most of the rivers in Brazil originate from the Brazilian Highlands.

(2) The altitude of Brazilian Highlands gradually decreases from the south to the north and from the west to the east. As its effect, most of the rivers in Brazil flow towards the northern and eastern direction.

(3) The rivers flowing towards northern direction meet the North Atlantic Ocean and the rivers flowing towards eastern direction meet the South Atlantic Ocean. Thus, there are no west flowing rivers in Brazil.

(7) The western coast does not have vast extending plain lands.

Ans. (1) Barring the Gujarat coast, the western coast is mostly a narrow strip of land between the Arabian Sea and the Western Ghats. It does not have any vast plain. The Gujarat coast is relatively broader, but it, too, has small and narrow coastal plains.

(2) The Konkan coast is full of spurs extending from the Western Ghats right up to the western coastline. It is rocky, having no vast plains.

(3) The Malabar coast is characterised by sand dunes, lagoons and backwaters. It, too, does not have any vast plain. Thus, the western coast does not have vast extending plain lands.

CHAPTER 4 : CLIMATE

(8) India receives precipitation from the northeast monsoon winds too. (Nov. '20; March '23)

Ans. (1) India receives most of its precipitation from the southwest monsoon winds. These winds enter the mainland of India from the southern regions and gradually flow towards the northern regions of India.

(2) These winds are obstructed by the Himalayan ranges in the north. As its effect, these winds start their return journey and start flowing backward towards the Indian Ocean.

(3) In their return journey, these winds blow from northeast to southwest direction. As its effect, these winds bring retreating monsoon in India. Thus, India receives precipitation from the northeast monsoon winds too.

(9) Snowfall doesn't always occur in Brazil. (Nov. '20)

Ans. For the answer, refer to Q. 5 (2) of Solved Question Paper of July 2024 given on in Section 1 of this book.

(10) Tropical cyclones occur rarely in Brazil.

(July '19-'22-'23; March '24-'25)

Ans. (1) In the northern coastal region near equator, the differences in the temperatures are negligible.

(2) In this region, the winds move vertically.

(3) The convergence zone of the trade winds is also found to be weak in this region. Therefore, tropical cyclones occur rarely in Brazil.

(11) The northeastern part of Brazilian Highlands receives very less rainfall.

(July '23)

Ans. (1) The winds blowing from the Southern Atlantic Ocean in the southeast and the northeast direction are obstructed by the Brazilian Highlands.

(2) These winds move upward along with the slopes of the Brazilian Highlands. At higher altitude, the condensation process takes place and windward side of Brazilian Highlands receives more rain.

(3) When these winds cross the top of Brazilian Highlands, go to other side of mountain, these winds are dry. As its effect, the leeward side of the Brazilian Highlands gets less rainfall. Therefore, the northeastern part of Brazilian Highlands receives very less rainfall.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

(12) Vegetation is scarce in the high altitude of Himalayas.

(March '23-'24)

Ans. (1) The temperature at high altitude of Himalayas is almost 0°C throughout the year. The area is almost snow covered for most of the days in year.

(2) Due to severe cold, vegetation do not grow in the high altitudes of Himalayas.

(3) During summer, the snow start melting and as its effect some seasonal flower trees grow in the higher altitude of Himalayas. These trees are extinct during winter. Therefore, vegetation is scarce in the high altitude of Himalayas.

(13) The northern part of Brazil is covered by dense forests.

(July '19)

Ans. (1) The amount of annual average rainfall is nearly 2000 mm in the northern part of Brazil. The annual average temperature of this region is about 28°C.

(2) The equator passes through the northern part of Brazil. Therefore, this region receives perpendicular sunrays throughout the year.

(3) Due to abundant sunshine and heavy rainfall, vegetation grow with high speed in this region. The life cycle and the density of vegetation is found to be high in this region. Therefore, the northern part of Brazil is covered by dense forests.

(14) Deciduous type of vegetation are found in India.

(March '22)

Ans. (1) Deciduous forests are found in the regions receiving rainfall between 1000 mm and 2000 mm.

(2) In most of the regions of India, the amount of rainfall is between 1000 mm and 2000 mm.

(3) Trees in deciduous forests, shed their leaves to maintain the minimum level of water. Thus, India has deciduous forests.

(15) Rainforests in Brazil are called the 'lungs of the world'.

(July '22) OR

The evergreen rainforests in Brazil are called the 'lungs of the world'.

(March '19; Sept. '21)

Ans. (1) Rainforests are seen in the northern regions near the equator in Brazil.

(2) The trees in rainforests draw in carbon dioxide and breathe out oxygen.

(3) Thus rainforests help in providing us with most of our required oxygen and absorbing the carbon dioxide. Therefore, rainforests in Brazil are called the 'lungs of the world'.

(16) A wide variety of species of insects is found in Brazil.

Ans. (1) Insects are mostly found in forests, grasslands and swampy lands.

(2) Many insects eat leaves, grass and nectar from the plant.

(3) The evergreen rainforests are seen in the northern parts of Brazil. The grasslands are found in the central parts and Paraguay-Parana river basin. Similarly, swampy lands are found in Pantanal region in Brazil. Therefore, a wide variety of species of insects is found in Brazil.

CHAPTER 6 : POPULATION

(17) Population is an important resource. (July '19)

Ans. (1) The economic and social growth and development of any country depends upon its quantity and quality of population.

(2) If a country has excess of population or if it has less population than requirement, it results in slow economic growth and development of country.

(3) If a country has optimum and quality population, its economic growth and development speeds up. In this way, population is an important resource.

(18) India's density of population is high.

Ans. (1) India occupies nearly 2.41 per cent of the world's total land.

(2) It has nearly 17.58 per cent of the world's total population.

(3) Thus, India has comparatively less per cent of the world's total land and more per cent of the world's total population. Therefore, India's density of population is high.

(19) Brazil's population density is very less.

Ans. (1) Brazil occupies nearly 5.6 per cent of the world's total land.

(2) It has nearly 2.78 per cent of the world's total population.

(3) Thus, Brazil has comparatively more per cent of the world's total land and less per cent of the world's total population. Therefore, Brazil's population density is very less.

CHAPTER 7 : HUMAN SETTLEMENTS

(20) In Brazil, majority of population is found in the eastern coastal areas. (Nov. '20; March '23)

Ans. (1) The initial settlements were found in the eastern coastal areas of Brazil.

(2) The eastern coastal areas of Brazil has plenty of water, availability of natural resources, deposits of minerals and availability of transport and regular power supply.

(3) Due to these favourable factors, agriculture, trade and industries are well-developed in this region. Therefore, in Brazil, majority of population is found in the eastern coastal areas.

(21) Settlements are sparse in northeastern Brazil.

(March '19 – '25)

Ans. For the answer, refer to Q. 5 (3) of Solved Question Paper of July 2024 given in Section 1 of this book.

CHAPTER 8 : ECONOMY AND OCCUPATIONS

(22) There are limitations on mining in the interior parts of Brazil.

(March '22)

Ans. For the answer, refer to Q. 7 (3) (B) of Solved Question Paper of July 2025 given on QR code in Section 4 of this book.

(23) Per capita land availability is more in Brazil as compared to India.

Ans. The total area of Brazil is nearly 85,15,770 sq. km. On the other hand, the total area of India is only 32,87,263 sq. km.

(2) The total population of Brazil is only 20 crores. On the other hand, the total population of India is nearly 130 crores.

(3) Thus, compared to India, Brazil has more land and less population. Therefore, per capita land availability is more in Brazil as compared to India.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

(24) A dense network of railways has developed in the North Indian Plains.

(March '19; July '23)

Ans. (1) The North Indian Plains are low lying. There are not many hills in this region. The density of population in this region is quite high.

(2) The agriculture, trade, commerce, industries are well-developed in the North Indian Plains.

(3) The need for transport of goods as well as need of passenger transport is very high in this region. Therefore, a dense network of railways has developed in the North Indian Plains.

(25) Brazil attracts a lot of international tourists. (Sept. '21)

Ans. Brazil attracts a lot of international tourists due to the following factors :

(1) White and clean sand beaches. (2) Attractive seacoasts. (3) Beautiful islands. (4) Evergreen, deep, dense rainforests in Amazon river basin. (5) Variety of Animal and birds species. (6) Gardens and Parks. (7) Cities like Brasilia, Rio de Janeiro, Sao Paulo, etc. (8) Manaus port and football stadium, etc.

(26) The waterways are not developed in Brazil. (March '25)

Ans. (1) Most of the rivers in Brazil flow at high speed.

(2) The amount of total discharge of many rivers is very huge.

(3) In Brazil, rigid topography is found at many places near river basins. Many of the areas near rivers are inaccessible. Therefore, (internal) waterways are not developed in Brazil.

(27) Ecotourism is being developed more in Brazil.

(March '22 – '23)

Ans. (1) Due to white sand beaches, scenic seacoasts, beautiful islands, evergreen dense forests, variety of species of birds and animals, gardens and parks, etc. tourism has increased in Brazil.

(2) Increased tourism may lead to pollution and environmental degradation. Therefore, it is necessary to control harmful effects of increased tourism.

(3) Promoting tourism as well as protecting environmental balance is equally essential. Therefore, ecotourism is being developed more in Brazil.

**Question
Set
18**

**DRAW A GRAPH AND ANSWER
THE QUESTIONS**

[Q. 6 (A) : Total Marks 6]

Q. Draw a graph with the help of the given statistical information and answer the following questions on the basis of the drawn graph :

(3 marks for drawing graph; 3 marks for graph based questions.)

Remember : (1) Either (A) or (B) is to be answered. (2) Statistical information will be given in Q. 6 (A). Students are expected to draw the graph accurately and neatly. Three questions also be asked related to graph.

(A) DRAW A GRAPH

CHAPTER 6 : POPULATION

Q. 1. With the help of given statistical data, prepare a simple bar graph and answer the following questions : (March '25)

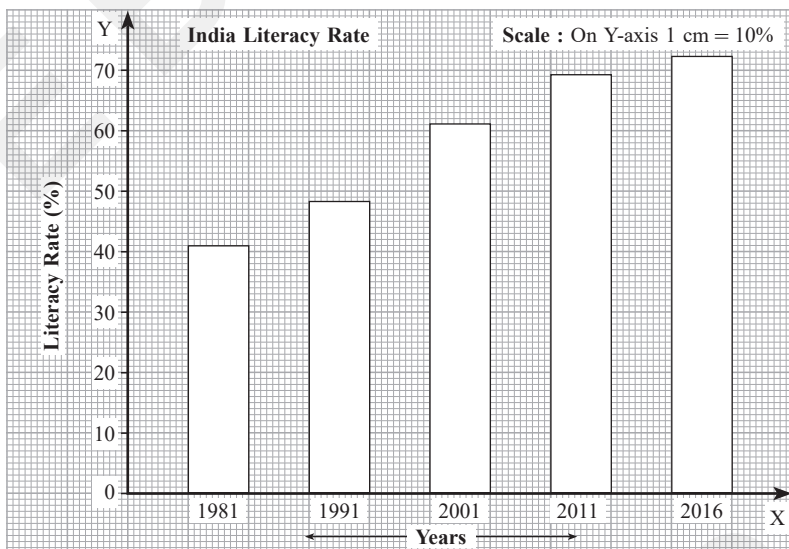

India – Literacy Rate Percentage (1981 to 2016)

Years	1981	1991	2001	2011	2016
% of Literacy	40.8	48.2	61.0	69.3	72.2

Questions :

- (1) What does the graph indicate?
- (2) What was the literacy rate in the year 1991?
- (3) How much was an increase in literacy rate in the decade from 1991 to 2001?

Ans. Simple Bar Graph :

- (1) The graph indicates the literacy rate of India.
- (2) The literacy rate in the year 1991 was 48.2%.
- (3) There was 12.8% increase in the literacy rate in the decade from 1991–2001.

CHAPTER 7 : HUMAN SETTLEMENTS

Q. 2. With the help of given statistical data, prepare a simple bar graph and answer the following questions : (Sept. '21)

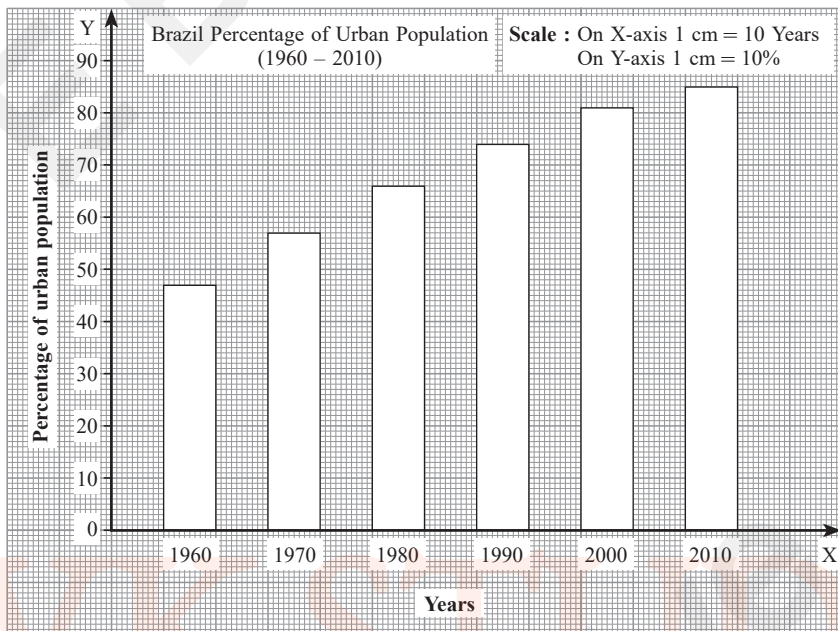

Brazil : Percentage of Urban Population (1960 to 2010)

Year	1960	1970	1980	1990	2000	2010
Percentage of Urban Population	47.1	56.8	66.0	74.6	81.5	84.6

Questions :

- (1) What is the interval of the data?
- (2) Which decade shows slow rate of urbanisation?
- (3) By how much per cent did the population increase between 1970 to 1980?

Ans. Simple Bar Graph :

- (1) The interval of the data is of 10 years.
- (2) 2000 to 2010 decade shows slow rate of urbanisation.
- (3) The population increased between 1970 to 1980 by 9.2%.

CHAPTER 8 : ECONOMY AND OCCUPATIONS

Q. 3. With the help of given statistical data, prepare a multiple line graph and answer the following questions : (July '19)

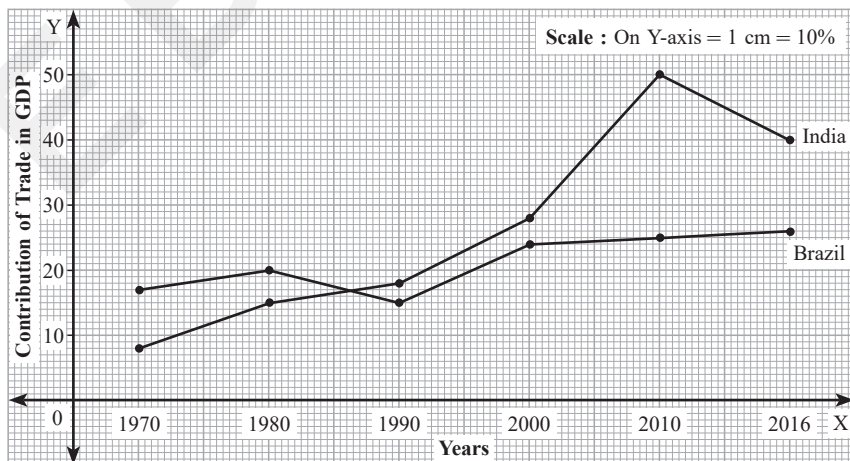

Contribution of Trade in GDP (in %) India and Brazil

Year	1970	1980	1990	2000	2010	2016
India	08	15	18	28	50	40
Brazil	17	20	15	24	25	26

Questions :

- (1) Which country has highest contribution of trade in GDP?
- (2) What is the contribution of trade in GDP of India in the year 2016?
- (3) What is the contribution of trade in GDP of Brazil in the year 1980?

Ans. Multiple Line Graph :

- (1) India has highest contribution of trade in GDP
- (2) The contribution of trade in GDP of India in the year 2016 is 40%.
- (3) The contribution of trade in GDP of Brazil in the year 1980 is 20%.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

Q. 4. With the help of given statistical data, prepare a line graph and answer the following questions :

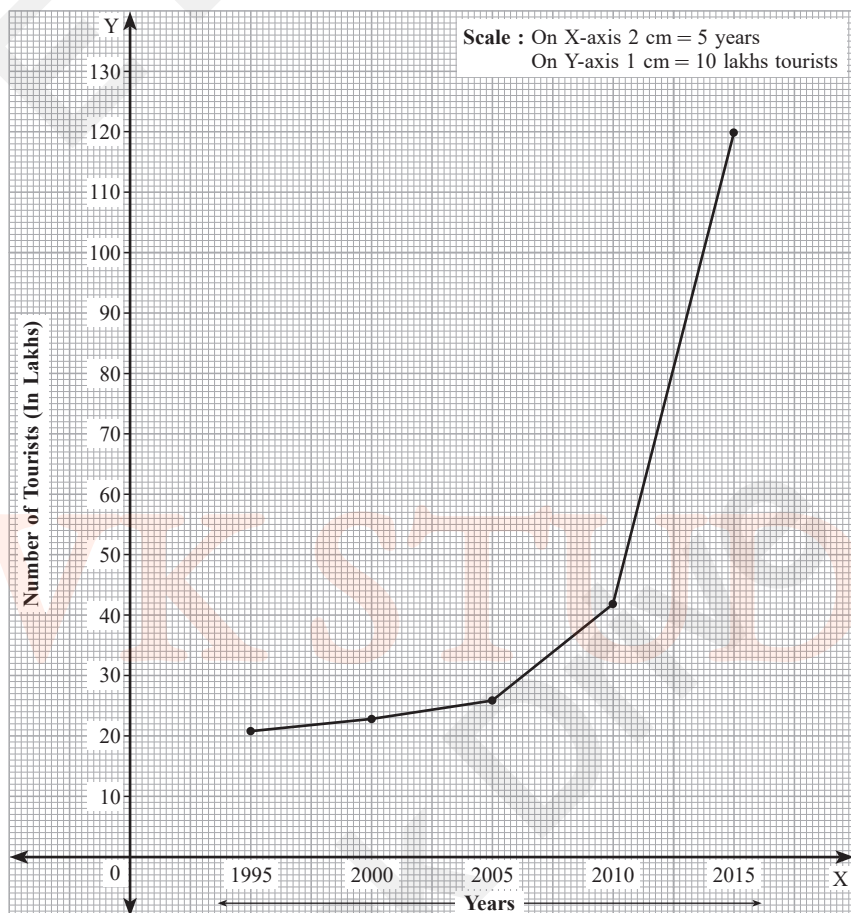

Number of International Tourists in India

Years	1995	2000	2005	2010	2015
Number of Tourists (In Lakhs)	21	23	26	42	120

Questions :

- (1) Which year had the least number of tourists?
- (2) The number of tourists had increased by how many lakhs between 2010 to 2015?
- (3) What was the number of International tourists in 2005?

Ans. Simple Line Graph – Number of International Tourists in India :

- (1) The year 1995 had the least number of tourists.
- (2) The number of tourists had increased by 78 lakhs between 2010 and 2015.
- (3) The number of international tourists in 2005 was 26 lakhs.

**Question
Set
19**

**GRAPH READING/
DIAGRAM READING**
[Q. 6 (B) : Total Marks 6]

Q. Answer the following questions on the basis of the given graph/diagram :

Remember : (1) Either (A) or (B) is to be answered. (2) A graph/diagram will be given in Q. 6 (B). Six graph/diagram based questions will be asked. (3) Students are expected to write answers to all questions.

CHAPTER 4 : CLIMATE

Q. 1. Observe the Figure (Graph) 4.4 given on page 27 of the textbook and answer the following questions :

(1) In which month is the highest temperature found in all the four cities?

Ans. In Manaus, the highest temperature is found in the months from August to October, in Belem it is found in the months of June to December, in Porto Alegre it is found in the months of January and February and in Rio de Janeiro it is found in the month of February.

(2) In which month does it rain the most in the given cities?

Ans. In Manaus, it rains most in the month of March, in Belem it is in the month of March, in Porto Alegre it is in the months of August and September and in Rio de Janeiro it is in the months of January and March.

(3) When does Brazil have its rainy season?

Ans. Brazil has its rainy season from September to November as well as from March to May.

(4) Which city has the maximum range of temperature? How much is it?

Ans. Manaus has the maximum range of temperature. It is nearly from 23°C (minimum temperature) to 33°C (maximum temperature).

(5) How much temperature is found in Porto Alegre in the month of June?

Ans. Nearly 10°C temperature is found in Porto Alegre in the month of June.

(6) What type of climate will be found in Rio de Janeiro?

Ans. Humid and moderate type of climate will be found in Rio de Janeiro.

CHAPTER 6 : POPULATION

Q. 2. Observe the Figure (Graph) 6.3 given on page 40 of the textbook and answer the following questions : (March '19)

(1) What do the graphs show?

Ans. The graphs show the sex ratio of Brazil and India.

(2) Which country has highest male population?

Ans. India has highest male population.

(3) Which country has highest female population?

Ans. Brazil has highest female population.

(4) Which country has rapid increase in female population after 2001?

Ans. Brazil has rapid increase in female population after 2001.

(5) What was the female population in India in 1961?

Ans. Female population was 940 in India in 1961.

(6) Which country has more than 1000 female population?

Ans. Brazil has more than 1000 female population.

Q. 3. Observe the Figure (Graph) 6.4 of India (2016) percentage of population given on page 41 of the textbook and answer the following questions : (Nov. '20)

(1) What does the graph show?

Ans. The name of the graph is : India : Age and Sex Pyramid.

(2) In which age group population is more?

Ans. The age group of 10 to 14 years has the maximum population.

(3) What is the class interval of the data shown on 'Y'-axis?

Ans. The class interval shown on the 'Y'-axis is of 4 years.

(4) In the group of above 60 years whose population is more, male or female?

Ans. The ratio of females is more in the age group of above 60 years.

(5) What is the percentage of female in the age group of 55 to 59?

Ans. The percentage of females in 55 to 59 age group is 2.

(6) Which age group onwards population has decreased?

Ans. From the age group of 10 to 14 years onwards the population has decreased.

Q. 4. Observe the Figure (Graph) 6.6 given on page 43 of the textbook and answer the following questions :

(Sept. '21; March '22)

(1) Which country has more life expectancy? (Sept. '21)

Ans. Brazil has more life expectancy.

(2) How much was an increase in life expectancy in India between 1990 and 2010? (Sept. '21)

Ans. There was an increase of 9 years in life expectancy in India between 1990 and 2010.

(3) How much life expectancy increased in Brazil between 1990 and 2016? (Sept. '21)

Ans. Life expectancy increased by 10 years in Brazil between 1990 and 2016.

(4) What was the difference in life expectancy between India and Brazil in the year 2000? (Sept. '21)

Ans. The difference in life expectancy between India and Brazil in the year 2000 was of 7 years.

(5) Which country has higher proportion of the old age population? (Sept. '21)

Ans. Brazil has higher proportion of the old age population.

(6) With reference to life expectancy of India in 1980, write the year in Brazil with same life expectancy. (Sept. '21)

Ans. With reference to life expectancy of India in 1980, the same life expectancy in Brazil was in 1960.

(7) What is the average life expectancy in India in the year 2016? (March '22)

Ans. The average life expectancy in India in the year 2016 is 68 years.

(8) In the year 1990, how much was an increase in life expectancy in Brazil as compared to India? (March '22)

Ans. In the year 1990, an increase (excess) in life expectancy in Brazil as compared to India was of 7 years.

(9) How much was the average life expectancy in 1980 in India, during which year do you find the same in Brazil?

(March '22)

Ans. The average life expectancy in 1980 in India (54 years) was found in 1960 in Brazil.

(10) Which country shows an increase in life expectancy during the period from 2010 to 2016? (March '22)

Ans. Brazil shows a greater increase in life expectancy during the period from 2010 to 2016.

(11) In which country do you find high life expectancy?

(March '22)

Ans. High life expectancy is found in Brazil.

(12) By how much was India's life expectancy lesser than Brazil in the year 1960? (March '22)

Ans. India's life expectancy was lesser than Brazil by 13 years in the year 1960.

Q. 5. Observe the Figure (Graph) 6.7 given on page 44 of the textbook and answer the following questions : (July '22)

(1) What does the graph indicate?

Ans. The graph indicates literacy rate in Brazil and India.

(2) Which country has a high literacy rate?

Ans. Brazil has a high literacy rate.

(3) In the year 2001, how much more is the literacy rate in Brazil than India?

Ans. In the year 2001, 25.4 per cent more is the literacy rate in Brazil than India.

(4) What is the highest literacy rate in India?

Ans. Highest literacy rate in India is 72.2 per cent.

(5) Which decade, in India, shows the highest increase in literacy rate?

Ans. Decade 1991 – 2001 shows the highest increase in literacy rate.

(6) How much is the literacy rate in Brazil in the year 2011?

Ans. The literacy rate in Brazil in the year 2011 is 91.4 per cent.

CHAPTER 7 : HUMAN SETTLEMENTS

Q. 6. Observe the Figure (Graph) 7.5 given on page 48 of the textbook and answer the following questions : (July '19)

(1) What was the percentage of urbanisation in 1961?

Ans. In 1961 urbanisation was 18 per cent.

(2) In which decade was urbanisation the highest?

Ans. Urbanisation was highest in the decade 1971 to 1981.

(3) In which decade was the growth of urbanisation lowest?

Ans. Urbanisation growth was lowest in the decade 1961 to 1971.

(4) What inference can you draw regarding India's urbanisation after reading the graph?

Ans. Seeing the trend of line graph we can say that urbanisation increased after the decade of 1971.

(5) What was the percentage of urbanisation in the year 1991?

Ans. In the year 1991, the percentage of urbanisation was 25.7 per cent.

(6) What was the percentage of urbanisation in the year 1971?

Ans. In the year 1971, in India, the urbanisation was 18.2 per cent.

CHAPTER 8 : ECONOMY AND OCCUPATIONS

Q. 7. Read the Figure (Graph) 8.1 given on page 52 of the textbook and answer the following questions :

(1) Which country's national income was highest in 2016?

Ans. USA's national income was highest in 2016 and it was 1850 million US \$.

(2) How much was national income of USA in 2016?

Ans. National income of USA in 2016 was 1850 million US \$.

(3) Comparing India and Brazil, which country had a higher national income in 1980?

Ans. Comparing India and Brazil, Brazil had a higher national income in 1980.

(4) Comparing India and Brazil, which country had a higher income in 2016?

Ans. Comparing India and Brazil, India had a higher income in 2016.

(5) Tell the difference between the GNP of Brazil and India in 2016.

Ans. The difference between the GNP of Brazil and India in 2016 was 10 million US \$.

(6) Calculate the difference between the national incomes of developed and developing countries in 2016.

Ans. The difference between the national incomes of developed and developing countries in 2016 was nearly 1680 to 1690 million US \$.

Q. 8. Read the Figure (Graph) 8.2 given on page 53 of the textbook and answer the following questions : (March '25)

(1) Which country has a higher percentage of population engaged in primary activities?

Ans. India has a higher percentage of population engaged in primary activities.

(2) In which country is the contribution of tertiary sector greater in GDP?

Ans. The contribution of tertiary sector is greater in GDP in Brazil.

(3) In which country is the share of secondary activities more in the GDP?

Ans. The share of secondary activities more in the GDP in Brazil.

(4) In which sector is the maximum percentage of population engaged in Brazil?

Ans. The maximum population in Brazil is engaged in the tertiary sector.

(5) How much more is Brazil's contribution in tertiary sector in GDP as compared to India?

Ans. Brazil's contribution in tertiary sector is 10 per cent more as compared to India.

(6) How much percentage of population is engaged in tertiary sector in India?

Ans. 26.9 per cent of population is engaged in the tertiary sector in India.

Q. 9. Read the Figure (Graph) 8.5 given on page 58 of the textbook and answer the following questions : (March '23)

(1) What type of graph is shown?

Ans. Multiple line graph/polyline graph is shown.

(2) What are the factors shown in the graph?

Ans. Contribution of trade in GDP of Brazil and India is shown in the graph.

(3) In which year do you find the percentage of contribution of trade in GDP similar?

Ans. The percentage of contribution of trade in GDP is similar in 1990.

(4) In the year 2010 in India, what is the percentage of contribution of trade in GDP?

Ans. In the year 2010 in India, the percentage of contribution of trade in GDP is 50 per cent.

(5) In the year 2000, which country's percentage of contribution of GDP trade was the highest?

Ans. In the year 2000, India's percentage of contribution of trade in GDP was the highest.

(6) In the year 2016, what is the difference in the percentage of contribution of trade in GDP of India and Brazil?

Ans. In the year 2016, the difference in the percentage of contribution of trade in GDP of India and Brazil is approximately 16 per cent.

Q. 10. Study the Figure (Graph) 8.6 given on page 59 of the textbook and answer the following questions :

(1) In which years the value of exports to Brazil exceeded the imports from Brazil?

Ans. In 2008, 2010, 2011, 2013, 2014 and 2015 the value of exports to Brazil exceeded the imports from Brazil.

(2) In which year the trade with Brazil was most favourable to all?

Ans. In 2013, the trade with Brazil was most favourable to all.

(3) Comment upon the Balance of Trade in the year 2013.

Ans. The value of Balance of Trade in the year 2013 for India with reference to Brazil was the maximum. The value of Balance of Trade for India was in surplus (favourable).

(4) In which year was the value of exports to Brazil was the maximum?

Ans. The value of exports to Brazil was the maximum in 2014.

(5) From which year the value of exports to Brazil have exceeded the value of imports from Brazil?

Ans. From 2013, the value of exports to Brazil have exceeded the value of imports from Brazil.

(6) Write a note on the trade between Brazil and India.

Ans. (1) India's trade with Brazil is of fluctuating nature. (2) Since 2013, the value of exports of India to Brazil have exceeded the value of imports of India from Brazil. (3) Since 2014, the India's export and import trade with Brazil shows downfall.

Q. 11. Study the Figure (Graph) given on page 60 of the textbook and answer the following questions : (March '24)

(1) Name the sectors mentioned in the graph.

Ans. The sectors mentioned in the graph are primary, secondary and tertiary.

(2) Which sector contributes the highest in National Income in India?

Ans. Tertiary sector contributes the highest in National Income in India.

(3) How much percent of population is engaged in primary sector in Brazil?

Ans. 10 per cent of population is engaged in primary sector in Brazil.

(4) Out of given two countries, the share of primary sector to the National Income is less in which country?

Ans. Out of given two countries, the share of primary sector to the National Income is less in Brazil.

(5) Which country's contribution of tertiary sector to the National Income is less?

Ans. India's contribution of tertiary sector to the National Income is less.

(6) In which sector 19% population of Brazil is engaged?

Ans. 19 per cent population of Brazil is engaged in the secondary sector.

CHAPTER 9 : TOURISM, TRANSPORT AND COMMUNICATION

Q. 12. Study the Figure (Graph) 9.1 given on page 61 and answer the following questions :

(1) What type of graph is shown here?

Ans. Multiple line graph is shown here.

(2) Which country attracted more international tourists in the year 1995?

Ans. India attracted more international tourists in the year 1995.

(3) In which country did more international tourists arrive in the year 2000?

Ans. More international tourists arrived in Brazil in the year 2000.

(4) In which year can an increase be seen in the number of international tourists in India?

Ans. An increase in the number of international tourists in India can be seen in the year 2010.

(5) What was the number of international tourists in the year 2015 in both the countries? What was the difference between them?

Ans. The number of international tourists was nearly 60 lakhs

in Brazil and was 130 lakhs in India. Thus, the difference between them was about 70 lakhs.

(6) What could be the reason of increase in tourists in India after the year 2010?

Ans. The professional outlook and increased facilities given to tourists could be the reason of increase in tourists in India after the year 2010.

Q. 13. Study the Figure (Graph) 9.2 given on page 61 and answer the following questions : (July '23)

(1) What type of graph is shown here?

Ans. Joint bar graph is shown here.

(2) What does the graph show?

Ans. The graph shows contribution of tourism in GDP and percentage of population engaged in tourism.

(3) Which country's tourism has a large share in the contribution towards GDP?

Ans. Brazil's tourism has a large share in the contribution towards GDP.

(4) Which country has a larger population engaged in tourism sector but contributes lesser in GDP?

Ans. India has a larger population engaged in tourism sector but contributes lesser in GDP.

(5) In India, how much per cent is the contribution of tourism in its GDP?

Ans. In India the contribution of tourism in its GDP is 7.9 per cent.

(6) How much per cent of Brazilian population is contributing in its tourism industry?

Ans. 8.2 per cent of Brazilian population is contributing in its tourism industry.

**Question
Set
20**

**ANSWER THE FOLLOWING
QUESTIONS IN DETAIL/EXPLAIN**

[Q. 7 : Total Marks 8]

Q. Answer the following questions in detail/explain :

(2 out of 3 questions; 4 marks each)

Remember : (1) Three questions will be given in question paper. (2) Students are expected to write answers to any two questions. (3) Four to eight points are expected in answer.

CHAPTER 1 : FIELD VISIT

(1) What is field visit? What are the things you carry for field visit? **(Sept. '21)**

Ans. (A) Meaning : For the answer, refer to Q. 7 (1) (A) of Solved Question Paper of July 2024 given in Section 1 of this book.

(B) The things to be carried for field visit : For the answer, refer to (4) (A) of this set.

(2) How will you manage the litter during field visit?

(March '19; July '23)

Ans. We will manage the litter during the field visit in the following ways :

(1) Carrying containers/bags/dustbins to collect litter dumped on a field.

(2) Informing everyone to not to dump trash/waste on a field during field visit.

(3) Creating awareness about cleanliness using charts and banners or performing street play, etc.

(4) Informing and requesting officials of local corporations for taking immediate remedial actions against litter/waste dump on a field.

(3) Prepare a questionnaire for a field visit to a sugar factory/factory. **(Nov. '20; March '24)**

Ans. The questionnaire for a field visit to a sugar factory/factory is as follows :

- (1) What is the year of establishment of this factory?
- (2) Which goods are manufactured in this factory?
- (3) How many workers are working in this factory?
- (4) Which raw material is essential for the goods manufactured in this factory?
- (5) From where is the raw material required for manufacturing the goods purchased?
- (6) Where are the goods manufactured supplied?
- (7) Which precautionary measures are taken to ensure the safety of workers?
- (8) Which environment protecting measures are taken by this factory?

**(4) (A) What items will you take with you for the field visit?
(B) What care will you take when you visit a seashore?**

(July '19)

Ans. (A) The items to be taken for the field visit : (1) Notebook, pen, pencil, scale, camera, etc. to collect information.

(2) Compass for knowing directions and maps for understanding various locations.

(3) Questionnaire as per the purpose of field visit.

(4) Containers or bags for collecting samples of water/soil/rocks/plants/crops, etc. Also a cap, a bottle of drinking water, first aid box, etc.

(B) We will take care of the following when we visit a seashore : *For the answer, refer to Q. 7 (1) (B) of Solved Question Paper of July 2024 given in Section 1 of this book.*

(5) If you are a part of field visit, what preparations will you make?

OR

Suppose teachers ask you to plan the visit, how will you plan the details of the trip?

Ans. We will make the following preparations/plan the following details of the trip :

(1) Deciding the place : (1) It includes planning about the location, distance, transportation route, means of transportation, duration of field visit, etc. (2) For example, deciding a place like

river bank/seashore/mountain/fort/plateau/farm/hill station/factory/railway station, etc.

(2) **Deciding the purpose :** (1) It includes deciding the aims and learning objectives of field visit. (2) For example, visiting a hill station and seashore to study the differences in climatic conditions between them.

(3) **Collecting/Obtaining essential documents :** (1) It includes collecting or obtaining the location map of a field, necessary permission letters, etc. (2) For example, obtaining permission letter of owner of a factory allowing a visit to a factory.

(4) **Preparing questionnaire :** (1) It includes preparing questionnaire as per the purpose of field visit. (2) For example, preparing following type of questionnaire to gather information from a farmer working on a farm : (i) For which crops is this land suitable? (ii) Which precautions are taken to protect crops from any harm? (iii) What type of irrigation is used for growing crops?

(6) What is field visit? What preparations should be done before going to a field visit? (March '25)

Ans. (A) Meaning : For the answer, refer to Q. 7 (1) (A) of Solved Question Paper of July 2024 given in Section 1 of this book.

(B) Preparations to be done before going to a field visit : For the answer, refer to (5) of this set.

CHAPTER 2 : LOCATION AND EXTENT

(7) How are Brazil and India different from each other in terms of location? (March '19)

Ans. Brazil and India are different from each other in terms of location as follows :

(1) Brazil is located in the Northern, Southern and Western Hemispheres.

(2) India is located completely in the Northern and Eastern Hemispheres.

(3) Brazil is located in the northern part of the continent of South America.

(4) India is located in the southern part of the continent of Asia.

(8) Write in detail about the historical background and the current status of India. OR

Describe in brief about the historical background of India.

(Nov. '20; March '23)

Ans. (1) For nearly, one and a half century, India was under British rule.

(2) India got independence on 15th August, 1947.

(3) Since independence, India has followed federal parliamentary republic type of government.

(4) Within twenty years after independence, India faced and overcame problems like three wars, famines in various parts and many other financial issues.

(5) Despite these issues, today India is a major developing country of the world.

(6) Today, India is considered as one of the major global markets.

(7) After independence, various economic reforms took place in India. These reforms boosted the rate of economic development in India.

(8) The proportion of working people (youth) in India's population is comparatively high. Therefore, India is looked upon as a young country.

(9) Explain the historical background of India and Brazil.

(July '23)

Ans. (A) Historical background of India : For the answer, refer to (8) of this set.

(B) Historical background of Brazil : For the answer, refer to (5) of Question Set 14.

(10) What problems did Brazil and India face after independence? **(March '19 – '25)**

Ans. Brazil and India faced the following problems after independence :

(1) Brazil : After independence, Brazil faced many financial crises.

(2) India : Within 20 years after independence, India has fought three wars.

(3) After independence, people from various parts of India coped up with severe famine situations.

(4) After independence, India faced many financial difficulties and a problem of slow rate of economic growth.

CHAPTER 3 : PHYSIOGRAPHY AND DRAINAGE

(11) (A) What are the five physical divisions of India?

(B) Write in brief about the Indian Islands. (July '19)

Ans. (A) Five major physiographic divisions of India are as follows : (1) The Himalayas (2) The North Indian plains (3) The Peninsula (4) Coastal Plains (5) Island groups.

(B) The Indian Islands :

(1) Lakshadweep Islands of India :

(1) Lakshadweep Islands is a group of islands of India located in the Arabian Sea.

(2) Lakshadweep Islands are to the southwest of the mainland of India. They are far away from the western coastline of India.

(3) Most of the islands in Lakshadweep are atoll islands.

(4) Most of the islands in Lakshadweep are tiny and low levelled.

(2) Andaman and Nicobar Islands :

(1) Andaman and Nicobar islands are group of islands of India located in the Bay of Bengal.

(2) Andaman and Nicobar islands are to the southeast of mainland of India. They are far away from the eastern coastline of India.

(3) Most of the islands in Andaman group are volcanic islands. They are large in extent and have hilly regions in their interior parts. Most of the islands in Nicobar group are atoll islands.

(4) Barren Island from Andaman group has the only active volcano in India.

(12) Explain the characteristics of the North Indian Plains.

(March '22)

Ans. The characteristics of the North Indian Plains are as follows :

(1) A flat low-lying area is located in the north of India. This region is known as the North Indian Plains.

(2) The North Indian Plains lie between Himalayan Mountain in

the north and the Peninsula in the south. It extends from the states of Rajasthan and Punjab in the west to Assam in the east.

(3) The North Indian Plains are divided into three parts.

(4) The low-lying area to the east of the Aravalis is known as Ganga plains. It slopes to the east.

(5) The delta of Ganga-Brahmaputra rivers extends in the state of West Bengal in India and Bangladesh. This region is known as Sunderbans. Sunderbans is the largest delta region in the world.

(6) The western part of the North Indian Plains is occupied by desert. It is known as Thar Desert or Marusthali. The state of Rajasthan is occupied by Thar Desert.

(7) The Plains of Punjab lies to the north of Thar Desert. It is located to the west of Aravalis and Delhi ranges.

(8) The Plains of Punjab slopes to the west. It has very fertile soil and therefore, agriculture is highly developed in this region.

(13) Explain the characteristics of the highlands of Brazil.

Ans. The characteristics of the highlands of Brazil are as follows :

(1) The southern part of Brazil is occupied by an extensive plateau. It is known as Brazilian Highlands or Brazilian Shield or Brazilian Plateau.

(2) The height of regions to the east and south of Brazilian Highlands is nearly 1000 m. In other parts, its altitude is between 500 m to 1000 m.

(3) The Brazilian highlands slopes to the north. The slopes of highlands are not very steep.

(4) Many rivers originate and flow from the northern slopes of the highlands of Brazil.

(5) Many tributaries of Amazon flow through this region. Many rapids and waterfalls are seen in this tributaries.

(6) The rivers like Uruguay, Paraguay and Parana originate from the southern slope of the Brazilian Plateau. These rivers flows from Brazil and enter Argentina.

(7) The slope towards the east of Brazilian Plateau is very steep. These steep slopes of Brazilian Plateau form the Great Escarpment.

(8) The highlands of Brazil and Guyana highlands together form the core of the continent of South America.

(14) Explain the characteristics of Amazon basin.

Ans. The characteristics of Amazon basin are as follows :

(1) Amazon river do not originate in Brazil. It originates from the eastern slopes of Andes Mountains in Peru. Negro, Japura, Purus, Zingu, etc. are the main tributaries of Amazon river.

(2) Amazon river basin forms the largest plains in Brazil. It is located in the northern parts of Brazil.

(3) Amazon river has a huge discharge of nearly 2 lakh m^3/s . Due to huge discharge, the sediments brought by Amazon river are not deposited at its mouth.

(4) Generally, a network of distributaries is seen at the mouth of river. But due to lack of the deposition of sediments, a dense network of distributaries are not seen at the mouth of Amazon river.

(5) A series of islands are developed along the mouth of Amazon river. These islands are located beyond the coastline into the Atlantic ocean.

(6) The width of the mouth of Amazon river is nearly 150 km.

(7) The width of the mouth of Amazon river increases as it approaches the North Atlantic Ocean.

(8) Most of the course of Amazon river as well as its mouth is used for navigation.

(15) What measures are being taken to control pollution in the rivers of India?

OR

Suggest measures to reduce river pollution during a field visit.

(March '23)

Ans. The following measures are being taken/can be taken to control pollution in the rivers of India/during a field visit :

(1) Controlling the discharge of human sewage into rivers.

(2) Applying sufficient and appropriate pre-treatment to the industrial effluent/waste before being discharged to the sewers.

(3) Displaying hoardings informing tourists not to pollute water of rivers and highlighting the importance of cleanliness.

(4) Removing solid waste from rivers and applying other river cleaning processes.

CHAPTER 4 : CLIMATE

(16) Explain the importance of Himalayas and the Indian Ocean with respect to the climate of India. (Sept. '21)

Ans. The importance of Himalayas and the Indian Ocean with respect to the climate of India can be explained as follows :

(1) The Indian Ocean and Himalayan ranges play an important role in formation of southeast monsoon winds.

(2) In summers, the temperature in Punjab Plains and the Thar desert is found to be high. As its effect, the areas of low pressure are developed.

(3) On the other hand, the areas of high pressure are found in the Indian Ocean. This leads to formation and flowing of southeast monsoon winds from the Indian Ocean to the mainland of India.

(4) These winds are moisture-laden and so they bring rainfall in India.

(5) Himalayas saves India by obstructing the passage of very cold winds from the north into India in winter.

(6) The southwest monsoon winds flow from the south to the north and reaches towards the Himalayas.

(7) These winds are obstructed by the Himalayas. Due to obstruction, these winds change their direction and start flowing from the northeast to the Indian Ocean.

(8) The return journey of these winds bring the retreating monsoon in peninsular region of India.

(17) Compare the climates of Brazil and India.

(July '19; March '22)

Ans. The climates of Brazil and India can be compared with the help of the following points :

(1) Brazil's climate is of tropical type. On the other hand, monsoon type of climate is seen in India.

(2) In Brazil, the temperature is comparatively higher in the northern part and lower in the southern part. On the other hand, in India, the temperature is comparatively lower in the northern part and higher in the southern part.

(3) In Brazil, the amount of rainfall is comparatively higher in the northern part and lower in the southern part. On the other hand, in India, the amount of rainfall is comparatively lower in the northern part and comparatively higher in the southern part.

(4) In Brazil, mild and humid climate is found near the coastal regions. On the other hand, in India, hot and humid climate is found near the coastal regions.

(18) Discuss the factors affecting climate of Brazil.

(March '19)

Ans. (1) Proximity to equator, Brazilian Highlands, the Great Escarpment are the main factors affecting climate of Brazil.

(2) Due to proximity to equator, the temperatures in the northern part of Brazil is comparatively higher. On the other hand, the temperatures in the southern part of Brazil is comparatively lower.

(3) The average temperature in the Amazon river basin in the northern part near equator is 25°C to 28°C. The overall climate in this region is found to be hot, humid and unhealthy.

(4) The amount of annual average rainfall in Amazon river valley is nearly 2000 mm. The amount of annual average rainfall is nearly 1000 mm to 1200 mm in the southeast coastal region.

(5) The temperature is comparatively low in the Brazilian highlands. Brazilian highlands receives moderate amount of rainfall, i.e. nearly 600 mm to 1200 mm.

(6) The great Escarpment and the Brazilian Highlands obstruct the trade winds blowing from the southeast and the northeast directions. This leads to heavy rainfall in the windward sides of the Great Escarpment, i.e. in the eastern coastal region of Brazil.

(7) The winds blowing beyond the Highlands become dry and therefore it rains less to the leeward side of the Great Escarpment and the Brazilian Highlands.

(8) As its effect, the northeast part of Brazil receives the minimum rainfall. The temperature is also found to be high in this region. This region is a rain shadow region. It is known as 'Drought Quadrilateral'.

(19) Describe in brief the changes occurring in the climatic conditions of India while going from south to north.

Ans. The changes occurring in the climatic conditions of India while going from south to north are as follows :

(1) In India, as we go from south to north, the temperatures keep dropping.

(2) For example, in peninsular region located in the southern part of India, the average temperature is found to be ranging between 25°C and 30°C. On the other hand, mountainous regions located in the northern part of India, the average temperature is found to be ranging between 5°C and 10°C.

(3) In India, as we go from south to north, the amount of rainfall also keeps decreasing.

(4) For example, in Chennai (located in the southern part of India), the amount of the maximum average rainfall in the month of November is nearly 410 mm. On the other hand, in Delhi (located in the northern part of India), the amount of the maximum average rainfall in the month of August is nearly 250 mm.

(20) What could be the reasons behind the flowing of winds from different directions towards Brazil?

Ans. The following could be the reasons behind the flowing of winds from different directions towards Brazil :

(1) The equator passes through the northern part of Brazil. The low pressure belt is found near equatorial region in Brazil.

(2) The winds from high pressure belt from southern and northern hemisphere flow towards this region in Brazil.

(3) As its effect, in the northern part of Brazil, the northeast trade winds flow.

(4) Similarly, in the southern part of Brazil, the southeast trade winds flow.

(21) Correlate northeast and southeast trade winds and rainfall with reference to obstruction in their way.

Ans. (1) The Great Escarpment and the Brazilian Highlands obstructs the northeast and southeast trade winds.

(2) As its effect, these winds move upwards along the slopes of the Great Escarpment and the Brazilian Highlands.

(3) At higher altitude, the condensation process takes place and windward side receives more rain.

(4) Thus, the windward side of the Great Escarpment and the Brazilian Highlands receive abundant rainfall and the rain shadow region is found to the other side.

(22) Give information about Drought Quadrilateral in Brazil.

Ans. (1) The Great Escarpment and the Brazilian Highlands obstructs the trade winds flowing in southeast and northeast from the Atlantic Ocean.

(2) Due to this obstruction, it rains heavily in the windward side of the Great Escarpment and the Brazilian Highlands, i.e. in the eastern coastal region of Brazil.

(3) The amount of annual average rainfall in the eastern coastal region of Brazil is nearly 1200 mm.

(4) The winds that reach the top of the Great Escarpment and the Brazilian Highlands become dry. The capacity of holding moisture of these winds increases.

(5) As its effect it rains less to the leeward side of the Great Escarpment and the Brazilian Highlands.

(6) Thus, the northeast part of Brazil receives the minimum rainfall.

(7) The amount of annual average rainfall is only nearly 600 mm in this region. This region is a rain shadow region.

(8) It is known as 'Drought Quadrilateral'. The higher temperature is found in this region.

CHAPTER 5 : NATURAL VEGETATION AND WILDLIFE

(23) What are the major causes of degradation of forests in Brazil and India? **(Nov. '20)**

Ans. For the answer, refer to Q. 7 (3) of Solved Question Paper of July 2024 given in Section 1 of this book.

(24) What environmental issues are faced by Brazil and India?

(March '25)

Ans. The following environmental issues are faced by Brazil and India :

(1) To fulfil the need of shelter of increasing population, for collecting firewood and for practising shifting cultivation trees are cut down on a large scale in both the countries. Therefore, Brazil and India facing a problem of deforestation.

(2) The problem of pollution is increasing in both the countries.

(3) Both the countries are facing a problem of environmental degradation due to increasing deforestation and pollution.

(4) Both the countries are facing a problem of extinction of many species of vegetation and wildlife.

(25) Correlate wildlife and natural vegetation in India and Brazil.

Ans. (1) Natural vegetation is food of grazers/herbivores and many birds. Grazers/Herbivores are the food of carnivores.

(2) The regions having variety of natural vegetation also have variety of herbivores. As its effect, carnivores are also seen on a large scale in these areas.

(3) For example, deer are seen on a large scale in grasslands areas of Brazil. As its effect, Jaguar are also seen in large scale in this region.

(4) For example, insects in grass is food of Indian bustard. Therefore, Indian bustards are largely seen in the grasslands of India.

(5) Normally, variety of wildlife is seen in the areas with abundant natural vegetation.

(6) For example, abundant natural vegetation is found in the northern region near equator in Brazil. As its effect, variety of animals and birds are seen in this region.

(7) The lack of natural vegetation adversely affects the wildlife.

(8) For example, in Thar deserts in India the natural vegetation is limited. As its effect, extremely limited species of animals and birds are seen here.

(26) Explain the diversity of wildlife in Brazil. (July '23)

Ans. The diversity of wildlife in Brazil is explained with the help of the following points :

(1) Brazil is blessed with the rich wildlife. It has the highest diversity in the wildlife in the world.

(2) Huge anacondas are mainly found in the swampy areas of Pantanal. The animals like guinea pigs, crocodiles, alligators, monkeys, pumas, leopards, etc. are commonly seen in Brazil.

(3) Variety of fish is found in Brazil. Swordfish are mainly found in Atlantic Sea near Brazil. Pink dolphins and piranhas are mainly seen in rivers in Brazil.

(4) Huge sized condors that flow high in the sky are seen in Brazil. Various types of parrots, macaws, flamingoes are the other major birds as well as millions of varieties of insects are also found in Brazil.

(27) Why does the deciduous type of vegetation occupy most of India?

Ans. (1) Deciduous type of vegetation is characterised by trees that shed their leaves during dry/summer season.

(2) Shedding leaves decreases the rate of evaporation and it helps trees to conserve water and energy.

(3) Deciduous type of vegetation is found in the areas receiving rainfall between 1000 mm and 2000 mm.

(4) In most of India, the amount of annual average rainfall is between 1000 mm to 2000 mm. Therefore, the deciduous type of vegetation occupies most of India.

(28) Where do you find thorny and shrub vegetation in India? Why?

Ans. (1) Thorny and shrub vegetation is found in the state of Rajasthan and in the central part of peninsula.

(2) Most of region of Rajasthan and the central part of peninsula is included in a rain shadow area.

(3) The annual average rainfall received by these region is less than 500 mm.

(4) Thorny and shrub like vegetation is mainly grown in the areas experiencing hot summers and receiving less than 500 mm of rainfall. Therefore, thorny and shrub vegetation is found in Rajasthan and the peninsula.

CHAPTER 6 : POPULATION

(29) Giving examples, correlate climate and population distribution.

Ans. (1) Climate and population distribution are closely related. The sparse distribution of population is found in the regions having heavy or scarce rainfall or too high or too low temperature.

(2) For example, in India, the sparse distribution of population is found in snow covered regions in Himalayan range as well as hot Thar desert. Similarly, in Brazil, the sparse distribution of population is found in the Amazon river basin receiving heavy rainfall.

(3) The dense distribution of population is found in the regions having average amount of rainfall and moderate temperature.

(4) For example, in India, the dense distribution of population is found in Ganga plains having average amount of rainfall and moderate temperature. Similarly, in Brazil, the dense distribution of population is found near southeastern coastal areas having average amount of rainfall and moderate temperature.

(30) Write a note on population growth rate in India and Brazil.

Ans. (A) Population growth rate in India : (1) In India, population growth rate was between 2 per cent to 2.3 per cent till 1971.

(2) From 1971 to 1991, the growth rate of population in India stabilised with 2.3 per cent.

(3) From 1991, the growth rate of population in India is slowly declining.

(4) In 2011, the growth rate of population in India was 1.7 per cent.

(5) Due to steeply falling death rate and slowly falling birth rate, the population of India is still growing.

(B) Population growth rate in Brazil : (1) From 1970 to 2010, the growth rate of population in Brazil had reduced considerably.

(2) In 1970, the growth rate of population in Brazil was 3 per cent. On the contrary, in 2010, the growth rate of population in Brazil is only 0.3 per cent.

(3) Extremely limited population growth rate of Brazil indicates that population of Brazil may not increase considerably in the next two decades.

(31) Correlate climate of southeastern coastal region of Brazil and population distribution.

Ans. (1) Temperate type of climate is found in the southeastern coastal region of Brazil.

(2) Mild and humid climate, average amount of rainfall, fertile soil and availability of resources have helped in flourishing agriculture and industries in the southeastern coastal region of Brazil.

(3) These favourable factors have led to dense distribution of population in the southeastern coastal regions of Brazil.

(4) According to Census 2010, the density of population in the southeastern coastal region (in the states of Sao Paulo and Rio de Janeiro) was the maximum, i.e. more than 300 persons per sq. km.

(32) Correlate life expectancy and social development.

Ans. (1) Increase in life expectancy indicates increase in social development of a country.

(2) Availability of medical facilities, advancement in medical sciences, availability of nutritious food, etc. factors help in increasing life expectancy.

(3) Compared to developed countries, life expectancy in developing countries is very less. Due to progress in the social and economic development in developing countries, the life expectancy in developing countries is gradually increasing.

(4) In India, in 1960, the life expectancy was only 41 years. On the contrary, in 2016 it was 68 years. This increase in life expectancy indicates increase in social development in India.

CHAPTER 7 : HUMAN SETTLEMENTS

(33) Write a comparative note on urbanisation in Brazil and India. (March '23)

Ans. (1) In Brazil, the rate of urbanisation is comparatively higher and in India, the rate of urbanisation is comparatively lower.

(2) In 2011, the rate of urbanisation in India was only 31.2 per cent. On the other hand in 2010, the rate of urbanisation in Brazil was 84.6 per cent.

(3) In India, the rate of urbanisation increased from 18 per cent in 1961 to 31.2 per cent in 2011.

(4) In Brazil, the rate of urbanisation increased from 47.1 per cent in 1960 to 84.6 per cent in 2010.

(5) In India, the rate of urbanisation has increased continuously from 1961 to 2011.

(6) In India, the rate of urbanisation has increased with fluctuating rate from 1961 to 2011.

(7) In Brazil, the rate of urbanisation has increased from 1960 to 2010.

(8) In Brazil, though the rate of urbanisation has increased from 1960 to 2010, it has increased by diminishing rate.

(34) Write in detail about human settlements in India.

Ans. (1) There exists variety in the patterns of human settlements in India.

(2) Variety in climatic conditions, availability of water, slope of land, fertility of land, level of development, etc. variety in human settlements is seen.

(3) In the river basins of Ganga, Narmada, Godavari, etc, nucleated settlements are seen in India.

(4) On the other hand, in the hot and arid area of Thar desert, scattered human settlements are seen in India.

(5) In India, nucleated settlements are seen in North Indian Plains and eastern coastal region.

(6) Dense human settlements are also seen in plateau region of Narmada valley, paddy lands in Bihar, Uttar Pradesh, Vindhyan Plateau and many other cultivable regions.

(7) Dispersed settlements are also seen in dense forest covered regions, tribal parts of Central India, western and southern Rajasthan, Himalayan slopes and land of uneven topography.

(8) In India, compared to urban settlements, rural settlements are found in greater numbers.

(35) Write a note on the urban population in India.

Ans. (1) In India, urban population is seen to be comparatively more in the states located in the central and southern part of India. Urban population is seen to be comparatively low in states located in northern and northeast parts of India.

(2) The states of Uttar Pradesh, Himachal Pradesh, Jammu and Kashmir, Uttarakhand, Haryana and Punjab located in the northern part of India as well as the states of Meghalaya, Assam, Arunachal Pradesh, Nagaland and Tripura located in the northeast part has only 0 to 40 per cent urban population.

(3) The union territories of Chandigarh and NCT of Delhi located in the northern part of India has 81 to 100 per cent of urban population.

(4) The state of Gujarat located in the central part of India has 41 to 80 per cent of urban population.

(5) The union territories of Daman and Diu, Dadra and Nagar Haveli has 41 to 80 per cent of urban population.

(6) The states of Maharashtra, Goa, Telangana, Kerala and Tamil Nadu located in the southern part of India has 41 to 80 per cent of urban population.

(7) The union territory of Lakshadweep Islands has 61 to 80 per cent of urban population. The union territory of Andaman and Nicobar Islands has 21 to 40 per cent of urban population.

(8) In India, the percentage of urban population is continuously rising.

CHAPTER 8 : ECONOMY AND OCCUPATIONS

(36) What are the similarities and differences in the fishing activities in Brazil and India? *(March '19; Sept. '21)*

Ans. (A) The similarities in the fishing activities in Brazil and India : (1) The marine fishing is practised in Brazil as well as India.

(2) The fishing is carried out on a large scale in salt water in Brazil and India.

(B) The differences in the fishing activities in Brazil and India : (1) In India, fresh water fishing is carried on at many places in rivers, canals, irrigation canals, tanks, ponds, lakes, etc. On the other hand, in Brazil, fresh water fishing is carried on a small scale due to rigid topography, dense forests and speedy discharge of rivers.

(2) Plankton is located on a large scale at the confluence of warm and cold ocean currents. Plankton provide a crucial source of food to fish. Due to confluence of hot and cold ocean currents near the eastern coast, fishing is well-developed in Brazil. On the other hand, though there is no such confluence of hot and ocean currents, fishing is developed in India due to many other favourable factors.

(37) Why has mining not developed in the western part of Brazil?

Ans. (1) There are comparatively less number of mineral deposits in the western part of Brazil.

(2) Most of the western part of Brazil is covered by the Amazon river basin. There are evergreen dense rainforests in this areas. Due to dense forests this area has become inaccessible. As its effect, there are natural limitations on the use and exploitation of mineral resources available in this areas.

(3) The density of human settlement is very low in the western part of Brazil. Thus, the demand for minerals in this part is comparatively low.

(4) Similarly, transport facilities are poorly developed in this areas. Therefore, mining has not developed in the western part of Brazil.

(38) Write information about agriculture occupation in India.

Ans. The information of agriculture in India can be given with the help of the following points :

(1) **Features :** The features of agriculture in India are as follows : (1) Agriculture is one of the traditional occupations in India. (2) Nearly 60 per cent of land of India is under cultivation. (3) Most of the agriculture in India is of subsistence nature. (4) Compared to Brazil, the contribution of agriculture in Gross Domestic Product is high. (5) Compared to Brazil, the percentage of population of total population engaged in agriculture is high.

(2) **The factors promoting a strong base :** Extensive plains, fertile soils, long growing seasons, variety in climate, etc. are the factors promoting a strong base for the development of agriculture in India.

(3) **Main crops grown :** Rice, wheat, sorghum, millets, maize, etc. food crops, tea, coffee, cotton, sugarcane, rubber, jute, etc. cash crops and variety of spices, fruits and vegetables are grown on a large scale in India.

(4) **Foreign exchange :** The agricultural produce like spices, mangoes, grapes, apples, vegetables, etc. are exported from India in world market. As its effect, agricultural produce helps in earning foreign exchange.

Q. 3 : Total Marks 4

Q. Differentiate between the following :

- (1) Ganga River Basin and Amazon River Basin. [Ch. 3]
- (2) Climate of India and Climate of Brazil. [Ch. 4]
- (3) Fishing in India and Fishing in Brazil. [Ch. 8]
- (4) IST and BRT. [Ch. 9] (July '19)

Q. 3 : Total Marks 4

Q. Write Short Notes :

- (1) The coastal rivers of Brazil. [Ch. 3]
- (2) Himalayas. [Ch. 3]
- (3) Features of Pantanal region. [Ch. 3]
- (4) Factors affecting urbanisation in Brazil. [Ch. 7]
- (5) Similarities and differences in the fishing activities in Brazil and India. [Ch. 8]

Q. 4 (A) : Total Marks 4

Q. Show the following on a given outline map of India.

- (1) Union territory – Daman. [Ch. 2] (March '23)
- (2) Heavy rainfall region to the west coast. [Ch. 4] (March '23)
- (3) Region of highest rainfall. [Ch. 4] (July '23)
- (4) Gangetic Dolphin. [Ch. 5] (July '23)

- (5) Sparsely populated state in the northeast India. [**Ch. 6**]
- (6) Mineral oil refineries in Assam – Digboi. [**Ch. 8**] (*March '22*)
- (7) Mumbai port. [**Ch. 9**]

Q. 4 (B) : Total Marks 4

Q. Answer the following questions on the basis of the given map : [Ch. 2] (Sept. '21)

- (1) Which longitude shows the Indian Standard Time?
- (2) Name the southernmost point of India.
- (3) Name the neighbouring countries towards the south of India.
- (4) Which latitude passes through the centre of India?
- (5) What is the North-South distance of India?

Q. 5 : Total Marks 6

Q. Give geographical reasons for the following statements :

- (1) There is not much difference in the range of temperature in Manaus. [**Ch. 4**]
- (2) Population density is high in Ganga plains. [**Ch. 6**]
- (3) Urbanisation is increasing rapidly in India. [**Ch. 7**] (*July '22*)
- (4) Settlements become sparse as we move towards the Amazon river basin. [**Ch. 7**] (*March '24*)
- (5) Fishing plays an important role in the economy of India.

[Ch. 8] (March '22 – '24)

Q. 6 (A) : Total Marks 6

- Q. 1. With the help of the given statistical data, prepare a simple bar graph and answer the questions : [Ch. 7] (March '22)

Percentage of Urban Population–Brazil (1960 to 2010)

Year	1960	1970	1980	1990	2000	2010
% of Urban Population	47.1	56.8	66.0	74.6	81.5	84.6

Questions :

- (1) What does the above simple bar graph show?
- (2) In which decade urbanisation occurred slowly?
- (3) What was the percentage of increase in urbanisation during the period from 1980 to 1990?

- Q. 2. With the help of the given statistical data, prepare a simple bar graph and answer the following questions :

[Ch. 8] (July '22)

India – Trade (% of GDP) (1980 to 2016)

Year	1980	1990	2000	2010	2016
Percentage of GDP	15	16	28	50	40

Questions :

- (1) What does the graph show?
- (2) What was the contribution of trade in GDP in the year 2010?
- (3) How much was a decrease in the percentage of GDP in the year from 2010 to 2016?

Q. 7 (A) : Total Marks 8

Q. Answer the following questions in detail :
